

ENVIRONMENTAL COMPLIANCE APPROVAL

NUMBER 6614-BFYPEG

Issue Date: June 30, 2020

JC Enviro Inc.
425 Kipling Avenue
Toronto, Ontario
M8Z 5C8

Site Location: 425 Kipling Avenue
Toronto City
M8Z 5C8

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

- One (1) scrubber treating emissions from a maximum of eight (8) 37,000-litre liquid waste storage tanks, discharging to the air at a volumetric flow rate of 0.17 cubic metre per second through a stack identified as STCK1, having an exit diameter of 0.2 metre and extending 2.7 metres above the roof and 8.23 metres above grade;
- one (1) exhaust system, serving the Lab Pack process, discharging vertically to the air at a volumetric flow rate of 0.17 cubic metre per second, through a stack identified as STCK2, having an exit diameter of 0.2 metre and extending 8.1 metres above grade;
- one (1) exhaust system, serving the QA/QC laboratory consisting of two (2) fume hoods, a gas chromatograph unit, and an atomic adsorption unit, discharging to the air at a volumetric flow rate of 0.17 cubic metre per second, through a stack identified as STCK3, with an exit diameter of 0.2 metre, extending 8.1 metres above grade;
- fugitive emissions from a sludge solidification process;
- one (1) storage tank having a maximum capacity of 101,855 litres, four (4) storage tanks each having a maximum capacity of 133,757 litres, and one (1) storage tank having a maximum capacity of 43,200 litres, all located in an outdoor tank farm;

all in accordance with the Application for Approval (Air & Noise) submitted by JC Enviro Inc., dated March 22, 2019 and signed by Marco Dalla Nora, the supporting information, including the Emission Summary and Dispersion Modelling Report prepared by Adomait Environmental Solutions Inc., dated March 26, 2019 and signed by Andrew Lane-Smith P. Eng.; additional information provided via email by Andrew Lane-Smith P.Eng. on November 18, 2019, April 16, 2020, April 30, 2020, and May 25,

2020; the Acoustic Assessment Report prepared by Hurlburt Environmental Engineering, dated February 21, 2020 and signed by Antje Hurlburt; as well as the additional information provided by Antje Hurlburt from Hurlburt Environmental Engineering in the emails dated March 10, 2020 and March 30, 2020, and all other supporting information and documentation submitted in support of the application.

For the purpose of this environmental compliance approval, the following definitions apply:

1. "*Approval*" means this Environmental Compliance Approval, including the application and supporting documentation listed above;
2. "*Best Management Practices for Industrial Sources of Odour*" means the *Ministry* Publication "Best Management Practices for Industrial Sources of Odour", dated January 31, 2017, as amended;
3. "*Company*" means JC Enviro Inc., that is responsible for the construction or operation of the *Facility* and includes any successors and assigns;
4. "*Director*" means a person appointed for the purpose of section 20.3 of the *EPA* by the *Minister* pursuant to section 5 of the *EPA*;
5. "*District Manager*" means the District Manager of the appropriate local district office of the *Ministry*, where the *Facility* is geographically located;
6. "*EPA*" means the Environmental Protection Act, R.S.O. 1990, c.E.19, as amended;
7. "*Equipment*" means the equipment or processes described in the *Company's* application, this *Approval* and in the supporting documentation submitted with the application, to the extent approved by this *Approval*;
8. "*ESDM Report*" means the Emission Summary and Dispersion Modelling Report which was prepared in accordance with section 26 of *O. Reg. 419/05* and the *Procedure Document* by Andrew Lanesmith P.Eng. of Adomait Environmental Solutions Inc., dated March 26, 2019, and submitted in support of the application, and includes any changes to the report made up to the date of issuance of this *Approval*;
9. "*Facility*" means the entire operation located on the property where the *Equipment* is located;
10. "*Licensed Engineering Practitioner*" has the same meaning as in Ontario Regulation 1/17;
11. "*Manager*" means the Manager, Technology Standards Section, Technical Assessment and Standards Development Branch, or any other person who

represents and carries out the duties of the Manager, Technology Standards Section, Technical Assessment and Standards Development Branch, as those duties relate to the conditions of this *Approval*;

12. "*Manual*" means a document or a set of documents that provide written instructions to staff of the *Company*;
13. "*Ministry*" means the ministry of the government of Ontario responsible for the *EPA* and includes all officials, employees or other persons acting on its behalf;
14. "*O. Reg. 419/05*" means Ontario Regulation 419/05, Air Pollution – Local Air Quality, as amended;
15. "*Odour Management Plan*" means a document which describes the measures to minimize odour emissions from the *Facility* and/or *Equipment*;
16. "*Point of Impingement*" has the same meaning as in section 2 of *O. Reg. 419/05*;
17. "*Pre-Test Plan*" means a plan for the *Source Testing* including the information required in Section 5 of the *Source Testing Code*;
18. "*Procedure Document*" means *Ministry* guidance document titled "Procedure for Preparing an Emission Summary and Dispersion Modelling Report" dated March 2018, as amended;
19. "*Publication NPC-207*" means the *Ministry* draft technical publication "Impulse Vibration in Residential Buildings", November 1983, supplementing the Model Municipal Noise Control By-Law, Final Report, published by the *Ministry*, August 1978, as amended;
20. "*Publication NPC-300*" means the *Ministry* Publication NPC-300, "Environmental Noise Guideline, Stationary and Transportation Sources – Approval and Planning, Publication NPC-300", August 2013, as amended;
21. "*Schedules*" means the following schedules attached to this *Approval* and forming part of this *Approval* namely:
 - Schedule A - Maximum Concentrations of Organic Compounds in Bulk Liquid Waste
 - Schedule B - *Targeted Sources and Test Contaminants for Source Testing*
 - Schedule C - *Source Testing* Procedures
 - Schedule D - Procedures for the Calculation of 10-minute Average Concentrations of Odour
22. "*Sensitive Receptor*" means any location where routine or normal activities occurring at reasonably expected times would experience adverse effect(s) from

odour discharges from the *Facility*, including one or a combination of:

- private residences or public facilities where people sleep (e.g.: single and multi-unit dwellings, nursing homes, hospitals, trailer parks, camping grounds, etc.);
- institutional facilities (e.g.: schools, churches, community centres, day care centres, recreational centres, etc.);
- outdoor public recreational areas (e.g.: trailer parks, play grounds, picnic areas, etc.); and
- other outdoor public areas where there are continuous human activities (e.g.: commercial plazas and office buildings);

23. "*Sludge Pit*" means the pit where the Sludge Solidification Process is conducted, as described in the *ESDM Report*;
24. "*Source Testing*" means site-specific sampling and testing to measure emissions resulting from operating the *Targeted Sources* under operating conditions that will derive an emission rate that, for the relevant averaging period of the contaminant, is at least as high as the maximum emission rate that the source of contaminant is reasonably capable of, or a rate approved by the *Manager* within the approved operating range of the *Targeted Sources* which satisfies paragraph 1 of subsection 11(1) of O. Reg. 419/05;
25. "*Source Testing Code*" means the Ontario Source Testing Code, dated June 2010, prepared by the *Ministry*, as amended;
26. "*Targeted Sources*" means the sources listed in Schedule B;
27. "*Test Contaminants*" means the contaminants listed in Schedule B.

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. OPERATION AND MAINTENANCE

1. The *Company* shall ensure that the *Equipment* is properly operated and maintained at all times. The *Company* shall:
 - a. prepare, before commencement of operation of the *Equipment*, and update, as necessary, a *Manual* outlining the operating procedures and a maintenance program for the *Equipment*, including:

- i. routine operating and maintenance procedures in accordance with good engineering practices and as recommended by the *Equipment* suppliers;
 - ii. emergency procedures, including spill clean-up procedures and procedures for emergency use of the six (6) storage tanks located in the outdoor tank farm;
 - iii. procedures for monitoring liquid wastes processed at the *Facility* and ensuring that the maximum allowable bulk liquid concentrations listed in Schedule A are not exceeded;
 - iv. procedures for any record keeping activities relating to operation and maintenance of the *Equipment* and monitoring of liquid wastes; and
 - v. all appropriate measures to minimize noise and odorous emissions from all potential sources.
 - b. implement the procedures and recommendations of the *Manual*.
 - c. review and update the procedures required by Condition 1.1.a.iii of this *Approval* as requested by the *District Manager*.
2. The *Company* shall ensure that the maximum allowable bulk liquid concentrations listed in Schedule A are not exceeded.
3. The *Company* shall ensure the six (6) storage tanks located in the outdoor tank farm are used only for emergency situations for the storage of contaminated water.
4. The *Company* shall ensure that only one collecting container is open at a time during solvent repackaging.

2. COMPLAINTS RECORDING AND REPORTING

1. If the *Company* receives an environmental complaint regarding the *Facility*, the *Company* shall respond to the complaint as follows:
 - a. The *Company* shall record each complaint in a written or digital tracking system. The information to be recorded shall include the following:
 - i. name, address and the telephone number of the complainant, if known;
 - ii. time and date of the complaint; and
 - iii. details of the complaints.
 - b. Within two (2) business days after the complaint is received, the *Company* shall notify the *District Manager* of the complaint.

- c. The *Company* shall forthwith attempt to verify if the complaint relates to operations at the *Facility* and initiate an investigation of the cause of the complaint. The investigation shall include, as a minimum, the following:
 - i. determination of the activities being undertaken at the *Facility* at the time of the complaint;
 - ii. meteorological conditions including, but not limited to the ambient temperature, approximate wind speed and its direction;
 - iii. determination if the complaint is attributed to activities being undertaken at the *Facility* and if so, the possible causes of the complaint;
 - iv. determination of the remedial actions to address the causes of the complaint, and the schedule for the implementation of the necessary remedial actions.
- d. The *Company* shall document the complaint investigation and shall make the document available for inspection by staff of the *Ministry* upon request.
- e. The *Company* shall respond to the complainant, if known, and the response shall include the results of the investigation of the complaint, the actions taken or planned to be taken to address the causes of the complaint, and if any follow-up responses would be provided.
- f. The *Company* shall, within one (1) week of the complaint date, submit a report to the *District Manager* on that complaint and all proposed actions to prevent recurrence of the complaint in the future.

3. RECORD RETENTION

1. Unless otherwise specified in this *Approval*, the *Company* shall retain, for a minimum of two (2) years from the date of their creation, all records and information related to or resulting from the recording activities required by this *Approval*, and make these records available for review by staff of the *Ministry* upon request. The *Company* shall retain:
 - a. all records on the maintenance, repair and inspection of the *Equipment*;
 - b. all records on the *Source Testing*;
 - c. all records related to the monitoring of liquid wastes;
 - d. all records associated with the *Odour Management Plan*;
 - e. all records and reports related to environmental complaints, including:
 - i. a description, time and date of each incident to which the complaint relates;

- ii. wind direction at the time of the incident to which the complaint relates; and
- iii. a description of the measures taken to address the cause of the incident to which the complaint relates and to prevent a similar occurrence in the future.

4. **ODOUR MANAGEMENT PLAN**

1. The *Company* shall, at all times, take all reasonable measures to minimize odorous emissions and odour impacts from all potential sources at the *Facility*.
2. The *Company* shall prepare and submit to the *District Manager*, not later than ninety (90) days prior to commencement of operation of the *Equipment*, or as otherwise directed by the *District Manager*, an *Odour Management Plan* that includes measures in place and proposed, to minimize odour impacts of the *Facility* on receptors.
3. The *Odour Management Plan* shall include:
 - a. *Facility* and process descriptions including a list of potential sources of odour;
 - b. a list of in place and proposed measures at the *Facility* that can minimize the odour impact of the *Facility* on receptors, including:
 - i. minimizing odour impacts from operation of the *Sludge Pit* ;
 - ii. an implementation schedule for any proposed measures.
 - c. best management practices described in the *Ministry's Best Management Practices for Industrial Sources of Odour* to ensure the effective implementation of the odour impact reduction measures, including:
 - i. periodic preventative activities and their frequency;
 - ii. inspection and maintenance procedures;
 - iii. monitoring initiatives; and
 - iv. record keeping practices for odour complaints and steps taken to address each complaint.
4. The *Company* shall:
 - a. implement the *Odour Management Plan*, as accepted by the *District Manager*, upon commencement of operations at the *Facility*.
 - b. update and revise the *Odour Management Plan* within three (3) months of implementation of any proposed modifications that may impact odour

- emissions or as directed by the *District Manager*;
- c. review and evaluate once every twelve (12) months from the date of this *Approval*, or at a frequency directed or agreed to in writing by the *District Manager*, the *Odour Management Plan* for the control of odour emissions;
 - d. record the results of each annual review and evaluation, and update the *Odour Management Plan* accordingly;
 - e. maintain the updated *Odour Management Plan* at the *Facility* and make it available to the *Ministry* staff upon request; and
 - f. implement, at all times, the most recent version of the *Odour Management Plan* within sixty (60) days of an update.
5. The *Company* shall record, and retain such records, each time a specific preventative and odour impact reduction measure described in the *Odour Management Plan* is implemented.

5. TECHNOLOGY BENCHMARKING REPORT

1. If the *Company* or the *District Manager* has received environmental complaints related to odour and the *Company* has been advised in writing by the *District Manager* that the complaints have not been resolved within a reasonable time period or to the satisfaction of the *District Manager*, the *Company* shall:
 - a. Submit to the *Director* a Technology Benchmarking Report prepared by a *Licensed Engineering Practitioner* to identify potential options to reduce odour impacts, no later than six (6) months after receipt of the written notification from the *District Manager*.
2. The Technology Benchmarking Report shall include the following, at a minimum:
 - a. a comprehensive list of all control methods for odour impact reduction based on the following:
 - i. a comparison of methods used by other facilities in the same or similar industrial sector;
 - ii. a review of emission control requirements and strategies from other jurisdictions; and,
 - iii. where applicable, transfer of technologies from other sectors with similar issues, including preventative steps such as material substitutions, process changes and add-on controls or treatment methods.

- b. an evaluation of the technical and economic feasibility of the identified control options individually, and where applicable, control options in combination. This evaluation will include the availability and applicability of the option to the odour source, technical considerations, economic considerations, and any site specific considerations;
- c. a ranking of feasible options, or option combinations with an assessment of predicted impact reductions at off-site receptors for major sources and aggregate facility emissions including percent contribution, maximum and average odour concentrations and frequency assessment at off-site sensitive receptors, and compared to current operations; and
- d. recommendations based on current odour impact assessment, predicted reductions that can be achieved by implementing feasible options, timelines, approval requirements and other applicable considerations.

6. SOURCE TESTING

1. If the *Company* or the *District Manager* has received environmental complaints related to odour and the *Company* has been advised in writing by the *District Manager* that the complaints have been validated and have not been resolved within a reasonable time period or to the satisfaction of the *District Manager*, the *Company* shall, upon receipt of written notification from the *District Manager*, conduct *Source Testing* in accordance with the procedures in Schedule C.

7. NOISE

- 1. The *Company* shall, at all times, ensure that the vibration emissions from the *Facility* comply with the limits set out in *Ministry Publication NPC-207*.
- 2. The *Company* shall, at all times, ensure that the noise emissions from the *Facility* comply with the limits set out in *Ministry Publication NPC-300*.

SCHEDULE A

Maximum Concentrations of Organic Compounds in Bulk Liquid Waste

Contaminant	CAS #	Maximum Allowable Concentrations in Bulk Liquid Waste (mg/L)
-------------	-------	--

Acetone	67-64-1	20,450
Acrylonitrile	107-13-1	0.30
Benzene	71-43-2	0.23
Bromodichloromethane	75-27-4	65.24
Bromoform	75-25-2	19.88
Bromomethane	74-83-9	188.50
Carbon tetrachloride	56-23-5	0.35
Chlorobenzene	108-90-7	241.07
Chloroethane	75-00-3	626.0
Chloroform	67-66-3	0.16
Chloromethane	74-87-3	37.77
Cumene	98-82-8	56.80
p-Dichlorobenzene	106-46-7	16.74
1,2-Dichloroethane	107-06-2	0.37
cis-1,2 Dichloroethene	156-59-2	15.35
trans-1,2-dichloroethene	156-60-5	14.34
Dichloromethane	75-09-2	32.15
Ethylbenzene	100-41-4	72.99
Methyl ethyl ketone	78-93-3	1187
Naphthalene	91-20-3	6.73
Styrene	100-42-5	62.99
1,1,1,2-Tetrachloroethane	630-20-6	0.09
1,1,2,2-Tetrachloroethane	79-34-5	0.04
Tetrachloroethylene	127-18-4	54.04
Toluene	108-88-3	276.1
1,1,1-Trichloroethane	71-55-6	14,892
1,1,2-Trichloroethane	79-00-5	0.06
Trichloroethylene	79-01-6	1.59
Vinyl chloride	75-01-4	0.11
Xylene(s)	1330-20-7	116.7

SCHEDULE B

Targeted Sources and Test Contaminants for Source Testing:

Targeted Source	Test Contaminants
Scrubber	Total Reduced Sulphur & Odour
Sludge Pit	

SCHEDULE C

Source Testing Procedures

1. The *Company* shall submit to the *Manager*, not later than three (3) months from the date of receipt of written notification from the *District Manager* of the need to conduct *Source Testing*, a *Pre-Test Plan* for the *Source Testing* required under this *Approval*. The *Company* shall finalize the *Pre-Test Plan* in consultation with the *Manager*.
2. The *Company* shall not commence the *Source Testing* required under this *Approval* until the *Manager* has approved the *Pre-Test Plan*.
3. The *Company* shall complete the *Source Testing* not later than three (3) months after the *Manager* has approved the *Pre-Test Plan* or within a period as directed or agreed to in writing by the *Manager* or the *District Manager*.
4. The *Company* shall notify the *Manager*, the *District Manager* and the *Director* in writing of the location, date and time of any impending *Source Testing* required by this *Approval*, at least fifteen (15) days prior to the *Source Testing*.
5. The *Company* shall submit a report (electronic format) on the *Source Testing* to the *Manager*, the *District Manager* and the *Director* not later than three (3) months after completing the *Source Testing*. The report shall be in the format described in the *Source Testing Code*, and shall also include, but not be limited to:
 1. an executive summary;
 2. an identification of the applicable North American Industry Classification System code (NAICS) for the *Facility*;
 3. records of operating conditions at the time of *Source Testing*, including but not limited to the following:
 - a. production data and equipment operating rate as a percentage of maximum capacity;
 - b. *Facility*/process information related to the operation of the *Targeted Sources*;
 - c. description of the emission sources controlled by the *Targeted Sources* at the time of testing; and
 - d. operational description of the general building ventilation at the time of testing;
 4. results of *Source Testing*, including the emission rate, emission concentration, and relevant emission factor of the *Test Contaminants* from the *Targeted Sources*;

5. for odour, the results of dispersion calculations indicating the maximum 10-minute average concentrations of odour at the *Point of Impingement* and at the most impacted *Sensitive Receptor* computed in accordance with Schedule D, and comparison with a 10-minute average concentration of 1 odour unit;
 6. a tabular comparison of calculated emission rates and emission factors based on *Source Testing* results for the *Test Contaminants* to relevant estimates described in the *ESDM Report*.
6. The *Director* may not accept the results of the *Source Testing* if:
1. the *Source Testing Code* or the requirement of the *Manager* were not followed;
 2. the *Company* did not notify the *Manager*, the *District Manager* and *Director* of the *Source Testing*; or
 3. the *Company* failed to provide a complete report on the *Source Testing*.
7. If the *Director* does not accept the result of the *Source Testing*, the *Director* may require re-testing. If re-testing is required, the *Pre-Test Plan* strategies need to be revised and submitted to the *Manager* for approval. The actions taken to minimize the possibility of the *Source Testing* results not being accepted by the *Director* must be noted in the revision.
8. The *Company* shall update their *ESDM Report* in accordance with Section 26 of *O. Reg. 419/05* and the *Procedure Document* with the results from the *Source Testing* if any of the calculated emission factors or calculated emission rates are higher than the predicted rates in the *ESDM report*, not later than three (3) months after the submission of the *Source Testing* report. The *Company* shall make these records available for review by staff of the *Ministry* upon request.

SCHEDULE D

Procedures for the Calculation of 10-minute Average Concentrations of Odour CALCULATE ONE-HOUR AVERAGE CONCENTRATIONS

1. The maximum one-hour average concentrations of odour at the Point of Impingement and the most impacted Sensitive Receptor shall be calculated using the Detailed Procedure described as follows:

Detailed Procedure

(a) Calculate one-hour average concentrations of odour at the Point of Impingement and the most impacted Sensitive Receptor at which the highest concentration occurs by employing the AERMOD atmospheric dispersion model that employs a five (5) years

of hourly local meteorological data set and in accordance with O. Reg. 419/05 that can provide results reported as individual one-hour average odour concentrations;

(b) Convert each one-hour average concentrations predicted over the five (5) years of hourly local meteorological data to a 10-minute average concentration using the One-hour Average to 10-Minute Average Conversion described below; and

(c) If the 10-minute average concentrations predicted to occur over the five (5) year period at the Point of Impingement or at the most impacted Sensitive Receptor exceed 1 odour unit, present the 10-minute average concentrations predicted to occur over the five (5) year period at the Point of Impingement and at the most impacted Sensitive Receptor that exceeded 1 odour unit in tabular form. The table shall identify all predicted 10-minute average odour concentration occurrences in terms of frequency, identifying the number of occurrences over the entire range of predicted odour concentration in increments of 1/10 of one odour unit. The table shall also present the cumulative frequency of occurrence and identify the modeled hour(s) (year, month, day, hour) of all predicted occurrences having the predicted 10-minute average odour concentration higher than 1 odour unit. The maximum 10-minute average concentration of odour at the Sensitive Receptor will be considered to be the maximum odour concentration at the most impacted Sensitive Receptor that occurs and is represented in the table, disregarding outlying data points as agreed by the Director.

ONE-HOUR AVERAGE TO 10-MINUTE AVERAGE CONVERSION

2. Use the following formula to convert one-hour average concentration predicted by an atmospheric dispersion model to a 10-minute average concentration:

$$X_S = 1.65 \times X_T$$

where:

X_S = 10-minute average concentration

X_T = one-hour average concentration

The reasons for the imposition of these terms and conditions are as follows:

1. Conditions No. 1 and 4 are included to emphasize that the *Equipment* must be maintained and operated according to a procedure that will result in compliance with the *EPA*, the Regulations and this *Approval*.
2. Condition No. 2 is included to require the *Company* to notify staff of the *Ministry* so as to assist the *Ministry* with the review of the site's compliance.
3. Condition No. 3 is included to require the *Company* to keep records and to provide information to staff of the *Ministry* so that compliance with the *EPA*, the regulations and this *Approval* can be verified.
4. Condition No. 5 is included to require the *Company* to provide information to the ministry on the efforts of the *Company* in minimizing odorous emissions relative to industry best practices.
5. Condition No. 6 is included to require the *Company* to gather accurate information

so that the environmental impact and subsequent compliance with the *EPA*, the regulations and this *Approval* can be verified.

6. Condition No. 7 is included to provide the minimum performance requirements considered necessary to prevent an adverse effect resulting from the operation of the *Facility*.

In accordance with Section 139 of the Environmental Protection Act, you may by written Notice served upon me, the Environmental Review Tribunal and in accordance with Section 47 of the Environmental Bill of Rights, 1993, the Minister of the Environment, Conservation and Parks, within 15 days after receipt of this Notice, require a hearing by the Tribunal. The Minister of the Environment, Conservation and Parks will place notice of your appeal on the Environmental Registry. Section 142 of the Environmental Protection Act provides that the Notice requiring the hearing shall state:

- a. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
- b. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

1. The name of the appellant;
2. The address of the appellant;
3. The environmental compliance approval number;
4. The date of the environmental compliance approval;
5. The name of the Director, and;
6. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary* Environmental Review Tribunal 655 Bay Street, Suite 1500 Toronto, Ontario M5G 1E5	AND	The Minister of the Environment, Conservation and Parks 777 Bay Street, 5th Floor Toronto, Ontario M7A 2J3	AND	The Director appointed for the purposes of Part II.1 of the Environmental Protection Act Ministry of the Environment, Conservation and Parks 135 St. Clair Avenue West, 1st Floor Toronto, Ontario M4V 1P5
--	-----	--	-----	--

*** Further information on the Environmental Review Tribunal's requirements for an appeal can be obtained directly from the Tribunal at: Tel: (416) 212-6349, Fax: (416) 326-5370 or www.ert.gov.on.ca**

This instrument is subject to Section 38 of the Environmental Bill of Rights, 1993, that allows

residents of Ontario to seek leave to appeal the decision on this instrument. Residents of Ontario may seek leave to appeal within 15 days from the date this decision is placed on the Environmental Registry. By accessing the Environmental Registry at <https://ero.ontario.ca/>, you can determine when the leave to appeal period ends.

The above noted activity is approved under s.20.3 of Part II.1 of the Environmental Protection Act.

DATED AT TORONTO this 30th day of June,
2020

Rudolf Wan, P.Eng.
Director
appointed for the purposes of Part
II.1 of the *Environmental Protection
Act*
