B. The definition of "Application" in the Approval is deleted and replaced with the following:

7. "Application" means the application for a Renewable Energy Approval dated November 16, 2011, and signed by Jason Gray, Director, SunEdison Canada and all supporting documentation submitted with the application, including amended documentation submitted up to August 8, 2012; and as further amended by the application for an amendment to a Renewable Energy Approval dated June 9, 2017, and signed by Mikhail Arkaev, Vice President, SunE Hwy 2 S GP Corp., as general partner for and on behalf of SunE Hwy 2 S LP and all supporting documentation submitted with the application, including amended documentation submitted up to July 25, 2017; and as further amended by the application for an amendment to a Renewable Energy Approval dated August 11, 2020, and signed by Clarke Herring, Vice-President, SunE Hwy 2 S GP Corp., as general partner for and on behalf of SunE Hwy 2 S LP and all supporting documentation submitted with the application, including amended documentation submitted up to March 8, 2021;

C. Condition H3 in the Approval is deleted.

D. Conditions H5, H6 and H7 are added to the Approval:

H5. Upon commencement of the operation of the Facility, the Company shall establish and carry out the following monitoring program for the sewage works:

(1) The Company shall collect and analyze the required set of samples at the sampling points listed in the table below in accordance with the measurement frequency and sample type specified for the effluent parameter, oil and grease, and create a written record of the monitoring:

| Effluent Parameters | Measurement Frequency and Sample Points | Sample Type |
|----------------------------|---|--------------------|
| Oil and Grease | B - Batch, i.e., for each discrete volume in the sump pump prior to pumpout; or A - Annually for direct effluent discharge | Grab |

(2) In the event of an exceedance of the maximum concentration objective, the Company shall:

- (a) increase the frequency of sampling to once per month, for each month that effluent discharge occurs, and
- (b) provide the District Manager, on a monthly basis, with copies of the written record created for the monitoring until the District Manager provides written direction that monthly sampling and reporting is no longer required;

H6. The Company shall:

- (a) as a minimum, check the oil detection system on a monthly basis and create a written record of the inspections;
- (b) ensure that the effluent is essentially free of floating and settle-able solids and does not contain oil or any other substance in amounts sufficient to create a visible film, sheen or foam on the receiving waters;
- (c) immediately identify and clean-up all losses of oil from the transformer;
- (d) upon identification of oil in the spill containment facility, take immediate action to prevent the further occurrence of such loss; and
- (e) ensure that equipment and material for the containment, clean-up and disposal of oil and materials contaminated with oil are kept within easy access and in good repair for immediate use in the event of:

- (i) loss of oil from the transformer,
- (ii) a spill within the meaning of Part X of the Act, or
- (iii) the identification of an abnormal amount of oil in the effluent.

H7. The Company shall comply with the following methods and protocols for any sampling, analysis and recording undertaken in accordance with Condition H5:

(1) Ministry of the Environment publication "Protocol for the Sampling and Analysis of Industrial/ Municipal Wastewater", January 1999, as amended from time to time by more recently published editions, and

(2) The publication "Standard Methods for the Examination of Water and Wastewater", 21st edition, 2005, as amended from time to time by more recently published editions.

All other terms and conditions remain the same.

The reason(s) for this amendment to the Approval is (are) as follows:

1. Conditions H5, H6 and H7 are included to ensure that the Facility is constructed, installed, used, operated, maintained and retired in a way that does not result in an Adverse Effect or hazard to the natural environment or any persons.
