2. Exploration Logistics and Detailed Information

Will explosives be used for any activity/activities? If yes describe in detail which activities require the explosives, where they will be stored, and any other relevant information.

No

What commodity or commodities are being sought in the work program?

Gold

How will you be transporting personnel to the exploration site for all activities? Describe in detail.

Crews will be transported to drill sites by truck, snowmobile or ATV, depending on weather and access trail conditions.

How will you be mobilizing/demobilizing equipment to and from the exploration site for all activities? Describe in detail.

Trucks will be used to mobilize equipment to the property. A bulldozer will be used for moves between drill sites.

What type of equipment will you be using for all of the early exploration activities?

Diamond drills, bulldozer and/or skidder for pad clearing, trail construction and drill transport, skid-mounted water tank(s), snowmobiles/ATVs/trucks for crew/supplies transport, excavator/backhoe for digging sumps and stripping, pressure washer for outcrop stripping, external water pumps and heating shacks. Muskeg tractor, snow cat for transport, if needed.

What type of drilling will take place? (e.g. core drilling, reverse circulation)
We plan to use diamond drill rigs for core drilling from 6-10 drill pads.

Do you anticipate the removal of the drill casing?

Yes No

If yes, when will you be removing it?

Immediately 3 to 6 months 6 to 12 months 1 to 2 years

For the exploration activities you have selected in your early exploration submission please fill in the associated details (required for all activities proposed). *

Please identify any non-prescribed activity/activities you will be undertaking to support the prescribed early exploration activity/activities

- Creating trails for the purposes of early exploration
- Creating roads for the purposes of early exploration
- Creating/setting up camp(s) to house personnel to perform your prescribed early exploration activities
Number of people in camp _____ Number of camps _____
- Ground geophysical surveys without a generator
- Airborne geophysical surveys

Are you planning to store fuel or other hazardous materials on the property? *

Yes No

Please provide any other information relevant to this project.

Most drill rods will be removed. Casing into bedrock will be lowered to ground level, capped, flagged/labelled and left in the hole to mark drill hole location and allow for hole re-entry or borehole geophysical surveys. Fuel will only be stored on the property during drilling operations and contained in double walled, skid-mounted tanks with appropriate spill kits available.

In swampy areas, trails and drill pads will be constructed using a geotextile base overlain by clean gravel/boulder fill.
