

Exploration Permit/Permis d'exploration

Number/Numero:

PR-21-000324

This permit is issued under the authority of section 78.3 of the *Mining Act* and the Exploration Plans and Exploration Permits Regulation (O. Reg. 308/12). It is subject to the provisions of the Act and regulation as well as the terms and conditions included in this permit.

Ce permis est émis conformément aux dispositions de section 78.3 de la *Loi sur les mines* et des règlements et est sujet aux restrictions et dispositions de ce lois et règlements ainsi qu'aux conditions ci-énoncées.

Note: The issuance of this permit does not relieve the applicant from the responsibility of acquiring any other agency, board, government, etc. approval as may be required nor does it relieve the permittee from the requirements of any other legislation or guarantee access to the land.

Remarque : La délivrance de ce permis n'exempte pas le demandeur de l'obligation d'obtenir l'autorisation de tout autre organisme, commission, gouvernement, etc. qui pourrait être exigée, n'exempte pas le titulaire des dispositions de toute autre loi et ne garantit pas l'accès à la terre.

2. Exploration Logistics and Detailed Information

Will explosives be used for any activity/activities? If yes describe in detail which activities require the explosives, where they will be stored, and any other relevant information.

Explosives would potentially be used for bulk sample collection and trail development, however they would not be stored on site and would be controlled by a certified third party.

What commodity or commodities are being sought in the work program?

Pd, Pt, Au, Cu, Ni

How will you be transporting personnel to the exploration site for all activities? Describe in detail.

The work site is accessible by four wheel drive small light vehicles, approximately 5-10km from the Trans Canada highway. They will travel from the town of Marathon, across highway 17 onto Camp 19 Rd which turns into a trail network. The trail network allows access through the Marathon Project.

Helicopters may be used as well to access areas in the project site that do not have a trail network.

How will you be mobilizing/demobilizing equipment to and from the exploration site for all activities? Describe in detail.

Heavy equipment will be floated 4km along the trail network and from there will walk the remaining distance to the project site. For remote locations where there is no trail access the equipment will be flown into site.

What type of equipment will you be using for all of the early exploration activities?

Diamond drills, RC drills, excavators, dozer, helicopters, generators, geophysical equipment, geotechnical equipment.

What type of drilling will take place? (e.g. core drilling, reverse circulation)

Majority of drilling will be diamond core drilling, NQ, with potential for reverse circulation to confirm reserve modeling.

Do you anticipate the removal of the drill casing?

Yes No

If yes, when will you be removing it?

Immediately 3 to 6 months 6 to 12 months 1 to 2 years

For the exploration activities you have selected in your early exploration submission please fill in the associated details (required for all activities proposed). *
