

ENVIRONMENTAL COMPLIANCE APPROVAL

NUMBER 4055-CGNJA5
Issue Date: August 31, 2022

YMCA of Three Rivers (Midwestern Ontario)
0008 3rd Line
Wellington North, Ontario
N0B 1J0

Site Location: Kitchener Waterloo YMCA - Camp Belwood
0008 3rd Line
Lot 8, Concession 3
Township of Centre Wellington, County of Wellington

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

upgrades to the existing Works for the treatment and subsurface disposal of domestic sewage from the existing children's seasonal summer residential campground (Kitchener Waterloo YMCA - Camp Belwood) consisting of twelve (12) small frame structures accommodating eighty five (85) youth overnight campers, thirty five (35) day campers and thirty five (35) full time staff, located at the above site location, rated at a maximum design capacity of 11,300 litres per day (L/day), consisting of the following:

PROPOSED WORKS

Dufferin Health and Wellness House and Dining Hall

- one (1) common pump chamber located between Dufferin Health and Wellness House and Dining Hall, receiving effluent from the existing Dufferin Health and Wellness House septic tank and raw sewage from the Dining Hall, having a minimum working capacity of 3,600 L, housing one (1) 1/2 hp submersible effluent pump rated at 0.05 L/s at 5 m THD, complete with a watertight access riser, a ventilation system, liquid level float switches, including a high liquid level audible and visual alarm system, discharging via a forcemain to a pre-treatment tank;

Fred and Frieda Washhouse, Dining Hall and Dufferin Health and Wellness House

- one (1) pre-treatment tank located north-west of the Fred and Frieda Washhouse, receiving effluent from the existing Dufferin Health and Wellness House septic tank and raw sewage from the Dining Hall and the Fred and Frieda Washhouse, having a minimum working capacity of 27,000 L, discharging by gravity via a

distribution box to a common tertiary treatment system;

- one (1) communal Norweco Hydro-Kinetic Triple Model 4730 tertiary wastewater treatment system, located north of the Fred and Frieda Washhouse, receiving effluent from the pre-treatment tank, having a treatment capacity of 14,190 L/d and designed to provide the total holding capacity of the system to provide a minimum of 70 hour retention of the equalized daily flow, consisting of precast concrete tanks providing separate anoxic, extended aeration, clarification and final filtration tanks complete with cast-in-place inlets, submerged transfer ports, access risers with removable covers, cast-in-place moulded plastic vent assembly, cast-in-place clarification outlet coupling and cast-in-place outlet tee, consisting of three (3) identical treatment trains, installed in parallel, each treatment train consisting of :
 - one (1) anoxic tank providing at least 15 hour retention of the equalized daily flow;
 - one (1) HK 4730 FEU extended aeration treatment tank providing at least 21 hour retention of the equalized daily flow, equipped with an aerator;
 - one (1) Bio-Film clarification chamber providing at least 7 hour retention of the equalized daily flow; and
 - one (1) Bio-Film Hydro-Kinetic filter chamber providing at least 12 hour retention of the equalized daily flow, housing a patented filtration unit (Bio-Kinetic) housing proprietary attached growth media, discharging to a common pump chamber;
- one (1) communal final pump chamber located north of the Fred and Frieda Washhouse, receiving effluent from the communal Norweco Hydro-Kinetic Triple Model 4730 tertiary wastewater treatment system, having a minimum working capacity of 13,500 L, housing two (2) 1/2 hp on-demand timed controlled submersible effluent pumps, one (1) pump rated a 0.32 L/s at 3.0 m TDH, discharging via a forcemain, delivering approximately 14 cycles per day for an approximate volume of 300 L/cycle within a maximum of 15 minutes for a total flow of 4,200 L/day via a distribution box to a Type A dispersal bed and a second pump rated at 2.5 L/s at 3.0 m TDH, discharging via a forcemain delivering approximately 3 cycles per day for an approximate volume of 2,200 L/cycle within a maximum of 15 minutes for a total flow of 6,600 L/d via a distribution box to an existing absorption trench bed, complete with a watertight access riser, a ventilation system and liquid level float switches, including a high liquid level audible and visual alarm system;
- one (1) 37.5 m long and 14 m wide raised Type A dispersal bed, located in the northern portion of the site, approximately 100 m from Lake Belwood, receiving effluent from the communal final pump chamber, rated at a maximum design capacity of 4,200 L/day, having a clear washed top stone area of 90 m² (a 9 m long, 10 m wide and minimum 200 mm thick layer of clear washed stone meeting OBC specifications) having a minimum separation distance of 600 mm between the bottom of the stone layer and the high groundwater table, rock or soil with a percolation rate (T) greater than 50 min/cm, nine (9) runs of 9 m long 75 mm diameter perforated distribution piping for the total length of distribution piping of 81 m, spaced 1.0 m apart from centre to centre, installed within the clear washed top stone area, and a contact area of 525 m² (a 37.5 m long, 14 m wide and minimum 300 mm thick layer of imported sand fill having a percolation time (T) of 6 to 10 min/cm meeting OBC specifications), including a minimum of 250 mm thick layer of imported sand fill mantle having a percolation time (T) of 6 to 10 min/cm and extending a minimum of 15 m beyond the top clear washed stone area in any direction that the effluent will move laterally in the soil away from the

dispersal bed;

all other controls, electrical equipment, instrumentation, piping, pumps, valves and appurtenances essential for the proper operation of the aforementioned Works;

EXISTING WORKS

Dufferin Health and Wellness House

- one (1) existing septic tank located north-west of the Dufferin Health and Wellness House, receiving raw sewage from the Dufferin Health and Wellness House, discharging by gravity to the new 3,600 L pump chamber;

Fred and Frieda Washhouse, Dining Hall and Dufferin Health and Wellness House

- one (1) existing absorption trench leaching bed located in the western portion of the site, approximately 97 m from Lake Belwood, rated at a maximum design capacity of 6,600 L/day, consisting of thirteen (13) runs of 18 m long 75 mm diameter perforated distribution piping, seven (7) runs of 30 m long 75 mm diameter perforated distribution piping and five (5) runs of 20 m long 75 mm diameter perforated distribution piping, for the total length of distribution piping of 544 m, spaced 1.6 m apart from centre to centre;

Shand Directors Cabin

- one (1) existing septic tank located west of the Shand Directors Cabin, receiving raw sewage from the Shand Directors Cabin, discharging by gravity to an existing filter bed;
- one (1) existing filter bed located west of the Shand Directors Cabin, rated at a maximum design capacity of 500 L/day, receiving effluent from the existing Shand Directors Cabin septic tank;

all other controls, electrical equipment, instrumentation, piping, pumps, valves and appurtenances essential for the proper operation of the aforementioned Works;

all in accordance with the submitted supporting documents listed in Schedule A.

For the purpose of this environmental compliance approval, the following definitions apply:

1. "Approval" means this entire Approval document and any Schedules to it, including the application and Supporting Documentation;
2. "CBOD₅" means five day carbonaceous (nitrification inhibited) biochemical oxygen demand measured in an unfiltered sample;
3. "Director" means a person appointed by the Minister pursuant to Section 5 of the EPA for the purposes of Part II.I of the EPA;

4. "Grab Sample" means an individual sample of at least 1000 millilitres collected in an appropriate container at a randomly selected time over a period of time not exceeding 15 minutes;
5. "District Manager" means the District Manager of the Guelph District Office;
6. "EPA" means the Environmental Protection Act, R.S.O. 1990, c.E.19, as amended;
7. "Existing Works" means those portions of the Works included in the Approval that have been constructed previously;
8. "Licensed Engineering Practitioner" means a person who holds a licence, limited licence or temporary licence under the *Professional Engineers Act*, R.S.O. 1990, c. P.28;
9. "Licensed Installer" means a person who is registered under the OBC to construct, install, repair, service, clean or empty on-site sewage systems;
10. "Ministry" means the ministry of the government of Ontario responsible for the EPA and OWRA and includes all officials, employees or other persons acting on its behalf;
11. "OBC" means the Ontario Building Code, Ontario Regulation 332/12 (Building Code) as amended to January 1, 2015, made under the *Building Code Act*, 1992, S.O. 1992, c. 23;
12. "Owner" means YMCA of Three Rivers (Midwestern Ontario) and its successors and assignees;
13. "OWRA" means the *Ontario Water Resources Act*, R.S.O. 1990, c. O.40, as amended;
14. "Proposed Works" means those portions of the Works included in the Approval that are under construction or to be constructed;
15. "Supporting Documentation" means the documents listed in Schedule A of this Approval;
16. "Works" means the approved sewage works, and includes Proposed Works, and Existing Works.

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. GENERAL PROVISIONS

1. The Owner shall ensure that any person authorized to carry out work on or operate any aspect of the Works is notified of this Approval and the terms and conditions herein and shall take all reasonable measures to ensure any such person complies with the same.
2. The Owner shall design, construct, operate and maintain the Works in accordance with the

conditions of this Approval.

3. Where there is a conflict between a provision of any document referred to in this Approval and the conditions of this Approval, the conditions in this Approval shall take precedence.

2. EXPIRY OF APPROVAL

1. This Approval will cease to apply to those parts of the Works which have not been constructed within five (5) years of the date of this Approval.

3. CHANGE OF OWNER

1. The Owner shall notify the District Manager and the Director, in writing, of any of the following changes within thirty (30) days of the change occurring:
 - a. change of address of Owner;
 - b. change of Owner, including address of new owner;
 - c. change of partners where the Owner is or at any time becomes a partnership, and a copy of the most recent declaration filed under the *Business Names Act*, R.S.O. 1990, c.B17 shall be included in the notification to the District Manager;
 - d. change of name of the corporation and a copy of the most current information filed under the *Corporations Informations Act*, R.S.O. 1990, c. C39 shall be included in the notification to the District Manager;
2. In the event of any change in ownership of the Works, other than a change to a successor municipality, the Owner shall notify in writing the succeeding owner of the existence of this Approval, and a copy of such notice shall be forwarded to the District Manager and the Director.
3. The Owner shall ensure that all communications made pursuant to this condition refer to the number of this Approval.

4. CONSTRUCTION

1. The Owner shall ensure that the construction of the Proposed Works is supervised by a Licensed Installer or a Licensed Engineering Practitioner.
2. The Owner shall ensure that the Works are constructed such that minimum horizontal clearance distances as specified in the OBC are satisfied.
3. The Owner shall ensure that the communal Norweco Hydro-Kinetic Triple Model 4730 tertiary wastewater treatment system is installed in accordance with the Manufacturer's Installation Manual.
4. The Owner shall ensure that an imported soil that is required for construction of any subsurface

disposal bed as per this Approval is tested and verified by the Licensed Engineering Practitioner or Licensed Installer for the percolation time (T) prior to delivering to the site location and the written records are kept at the site.

5. Upon construction of the Proposed Works, the Owner shall prepare a statement, certified by a Licensed Installer or a Licensed Engineering Practitioner, that the Works are constructed in accordance with this Approval, and upon request, shall make the written statement available for inspection by Ministry staff.
6. Upon construction of the Works, the Owner shall prepare a set of as-built drawings showing the Works "as constructed". "As-built" drawings shall be kept up to date through revisions undertaken from time to time and a copy shall be retained at the site for the operational life of the Works and shall be made available for inspection by Ministry staff.

5. MONITORING AND RECORDING

The Owner shall, upon commencement of operation of the Works, carry out the following monitoring program:

1. All samples and measurements taken for the purposes of this Approval are to be taken at a time and in a location characteristic of the quality and quantity of the effluent stream over the time period being monitored.
2. Samples shall be collected at the sampling point, at the sampling frequency and using the sample type specified for each parameter listed in the Effluent Monitoring Table included in Schedule B.
3. The Owner shall employ measurement devices to accurately measure quantity of effluent being discharged to each individual subsurface disposal system, including but not limited to water/wastewater flow meters, event counters, running time clocks, or electronically controlled dosing, and shall record the daily volume of effluent being discharged to the subsurface disposal system.
4. The Owner shall ensure that flow of treated effluent discharged into the existing absorption trench leaching bed does not exceed 11,000 L/day and into the raised Type A dispersal bed does not exceed 4,200 L/day.
5. The methods and protocols for sampling, analysis and recording shall conform, in order of precedence, to the methods and protocols specified in the following documents and all analysis shall be conducted by a laboratory accredited to the ISO/IEC:17025 standard or as directed by the District Manager:
 - a. the Ministry's Procedure F-10-1, "Procedures for Sampling and Analysis Requirements for Municipal and Private Sewage Treatment Works (Liquid Waste Streams Only), as amended from time to time by more recently published editions;
 - b. the Ministry's publication "Protocol for the Sampling and Analysis of Industrial/Municipal

Wastewater" (January 1999), ISBN 0-7778-1880-9, as amended from time to time by more recently published editions; and

- c. the publication "Standard Methods for the Examination of Water and Wastewater" (21st edition), as amended from time to time by more recently published editions.
6. The Owner shall retain for a minimum of five (5) years from the date of their creation, all records and information related to or resulting from the monitoring activities required by this Approval.

6. EFFLUENT OBJECTIVES

1. The Owner shall design and undertake everything practicable to operate the Works in accordance with the following objectives:
 - a. Final Effluent parameters design objectives listed in the table(s) included in Schedule B.
2. For the purposes of subsection (1):
 - a. The concentrations of CBOD₅ and TSS named in Column 1 of Effluent Objectives Table listed in Schedule B, as measured at each monitoring event, should be compared to the corresponding concentration set out in Column 2 of Effluent Objectives Table listed in Schedule B.

7. OPERATIONS AND MAINTENANCE

1. The Owner shall ensure that, at all times, the Works and the related equipment and appurtenances used to achieve compliance with this Approval are properly operated and maintained. Proper operation and maintenance shall include effective performance, adequate funding, adequate staffing and training, including training in all procedures and other requirements of this Approval and the OWRA and regulations, adequate laboratory facilities, process controls and alarms and the use of process chemicals and other substances used in the Works.
2. The Owner shall prepare an operations manual within six (6) months of the introduction of sewage to the Works, that includes, but not necessarily limited to, the following information:
 - a. operating procedures for routine operation of all the Works;
 - b. inspection programs, including frequency of inspection, for all the Works and the methods or tests employed to detect when maintenance is necessary;
 - c. repair and maintenance programs, including the frequency of repair and maintenance for all the Works; copies of maintenance contracts for any routine inspections & pump-outs should be included for all the tanks and treatment units;
 - d. procedures for the inspection and calibration of monitoring equipment;
 - e. a spill prevention control and countermeasures plan, consisting of contingency plans and

procedures for dealing with equipment breakdowns, potential spills and any other abnormal situations, including notification of the Spills Action Centre (SAC) and District Manager; and

- f. procedures for receiving, responding and recording public complaints, including recording any follow-up actions taken.
3. The Owner shall maintain an up to date operations manual and make the manual readily accessible for reference at the Works for the operational life of the Works. Upon request, the Owner shall make the manual available to Ministry staff.
4. The Owner shall, upon the construction, prepare and make available for inspection by Ministry staff, a maintenance agreement with the manufacturer for the treatment process/technology or its authorized agent. The maintenance agreement must be retained at the site and kept current for the operational life of the Works.
5. The Owner shall ensure that all septic tanks are pumped out every 3-5 years or when the tank is 1/3 full of solids and the effluent filters are cleaned out at minimum once a year or more often if required.
6. The Owner shall ensure that grass-cutting is maintained regularly over the subsurface disposal beds, and that adequate steps are taken to ensure that the area of the underground Works is protected from vehicle traffic.
7. The Owner shall visually inspect the general area where Works are located for break-out once every month during the operating season.
8. In the event a break-out is observed from a subsurface disposal bed, the Owner shall do the following:
 - a. sewage discharge to that subsurface disposal system shall be discontinued;
 - b. the incident shall be immediately reported verbally to the Spills Action Centre (SAC) at (416) 325-3000 or 1-800-268-6060;
 - c. submit a written report to the District Manager within one (1) week of the break-out;
 - d. access to the break-out area shall be restricted until remedial actions are complete;
 - e. during the time remedial actions are taking place the sewage generated at the site shall not be allowed to discharge to the environment; and
 - f. sewage generated at the site shall be safely collected and disposed of through a licensed waste hauler to an approved sewage disposal site.
9. The Owner shall employ for the overall operation of the Works a person who possesses the level of

training and experience sufficient to allow safe and environmentally sound operation of the Works.

10. The Owner shall retain for a minimum of five (5) years from the date of their creation, all records and information related to or resulting from the operations and maintenance activities required by this Approval.

8. REPORTING

1. One week prior to the start up of the operation of the Works, the Owner shall notify the District Manager (in writing) of the pending start up date.
2. In addition to the obligations under Part X of the EPA and O. Reg. 675/98 (Classification and Exemption of Spills and Reporting of Discharges) made under the EPA, the Owner shall, within fifteen (15) days of the occurrence of any reportable spill as provided in Part X of the EPA and O. Reg. 675/98, submit a full written report of the occurrence to the District Manager describing the cause and discovery of the spill, clean-up and recovery measures taken, preventative measures to be taken and a schedule of implementation.
3. The Owner shall, upon request, make all manuals, plans, records, data, procedures and supporting documentation available to Ministry staff.
4. The Owner shall prepare and submit a performance report, on an annual basis, within ninety (90) days following the end of each operational season to the District Manager. The first such report shall cover the first annual period following the commencement of operation of the Works and subsequent reports shall cover successive annual periods following thereafter. The reports shall contain, but shall not be limited to, the following information:
 - a. a summary and description of efforts made and results achieved in meeting the Effluent Objectives of Condition 6;
 - b. a summary and interpretation of all monitoring data and a comparison to the Effluent Objectives of Condition 6, including an overview of the success and adequacy of the Works, and a Contingency Plan in the event of not in meeting the Effluent Objectives.
 - c. a review and assessment of performance of Works, including all treatment units and disposal beds;
 - d. a description of any operating problems encountered and corrective actions taken at all Works located at the property;
 - e. a record of all maintenance carried out on any major structure, equipment, apparatus, mechanism or thing forming part of all Works located at the property including but not limited to: records of maintenance inspections for the treatment system, records of septic tank effluent filters cleaning, records of septic tank pump-outs, records of sludge pump-outs accumulated from the treatment system, records of visual inspections of all disposal systems;

- f. a summary of any effluent quality assurance or control measures undertaken in the reporting period;
- g. a summary and interpretation of all daily flow data and results achieved in not exceeding the maximum daily sewage flow discharged into each one of the subsurface disposal system;
- h. a summary of any complaints received during the reporting period and any steps taken to address the complaints;
- i. a summary of all spill or abnormal discharge events;
- j. any other information the District Manager requires from time to time;

9. DECOMMISSIONING OF UN-USED WORKS

1. The Owner shall properly abandon any portion of unused existing Works, as directed below, and upon completion of decommissioning report in writing to the District Manager.
 - a. any sewage pipes leading from building structures to unused Works components shall be disconnected and capped;
 - b. any unused septic tanks, holding tanks and pump chambers shall be completely emptied of its content by a licensed hauler and either be removed, crushed and backfilled, or be filled with granular material;
 - c. if the area of the existing leaching bed is going to be used for the purposes of construction of a replacement bed or other structure, all distribution pipes and surrounding material must be removed by a licensed hauler and disposed off site at an approved waste disposal site; otherwise the existing leaching bed may be abandoned in place after disconnecting, if there are no other plans to use the area for other purposes.

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is imposed to ensure that the Works are built and operated in the manner in which they were described for review and upon which approval was granted. This condition is also included to emphasize the precedence of conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review. The condition also advises the Owners their responsibility to notify any person they authorized to carry out work pursuant to this Approval the existence of this Approval.
2. Condition 2 is included to ensure that, when the Works are constructed, the Works will meet the standards that apply at the time of construction to ensure the ongoing protection of the environment.
3. Condition 3 is included to ensure that the Ministry records are kept accurate and current with respect to the approved Works and to ensure that subsequent owners of the Works are made aware of the Approval and

continue to operate the Works in compliance with it.

4. Condition 4 is included to ensure that the Works are constructed, and may be operated and maintained such that the environment is protected and deterioration, loss, injury or damage to any person or property is prevented.
5. Condition 5 is included to enable the Owner to evaluate and demonstrate the performance of the Works, on a continual basis, so that the Works are properly operated and maintained at a level which is consistent with the design objectives specified in the Approval and that the Works does not cause any impairment to the receiving environment.
6. Condition 6 is imposed to establish non-enforceable effluent quality objectives which the Owner is obligated to use best efforts to strive towards on an ongoing basis. These objectives are to be used as a mechanism to trigger corrective action proactively and voluntarily before environmental impairment occurs.
7. Condition 7 is included to require that the Works be properly operated, maintained, and equipped such that the environment is protected. As well, the inclusion of an operations manual, maintenance agreement with the manufacturer for the treatment process/technology and a complete set of "as constructed" drawings governing all significant areas of operation, maintenance and repair is prepared, implemented and kept up-to-date by the owner and made available to the Ministry. Such information is an integral part of the operation of the Works. Its compilation and use should assist the Owner in staff training, in proper plant operation and in identifying and planning for contingencies during possible abnormal conditions. The manual will also act as a benchmark for Ministry staff when reviewing the Owner's operation of the work.
8. Condition 8 is included to provide a performance record for future references, to ensure that the Ministry is made aware of problems as they arise, and to provide a compliance record for all the terms and conditions outlined in this Approval, so that the Ministry can work with the Owner in resolving any problems in a timely manner.
10. Condition 9 is included to ensure that any components of un-used Works are properly decommissioned.

Schedule A forms part of this Approval and contains a list of supporting documentation/information received, reviewed and relied upon in the issuance of this Approval.

SCHEDULE A

1. Environmental Compliance Approval Application submitted by Jackie Coughlin, B.A.Sc., P.Eng., Partner/Senior Environmental Engineer, Azimuth Environmental Consulting, Inc., dated June 2, 2021 and received on August 12, 2021.
2. The design report titled "Environmental Compliance Approval Assessment Report (Private Sewage Works) YMCA Camp Belwood Fergus, ON" dated March 2021 and prepared by Azimuth Environmental Consulting, Inc.
3. All other information and documentation provided by Azimuth Environmental Consulting, Inc. it relates to this application.

SCHEDULE B

Effluent Objectives Table

Final Effluent Parameter Effluent discharged from the communal Norweco Hydro-Kinetic Triple Model 4730 tertiary wastewater treatment system prior to discharged to the existing absorption trench leaching bed and a raised Type A dispersal bed	Averaging Calculator	Concentration Objective (milligrams per litre unless otherwise indicated)
Column 1	Column 2	Column 3
CBOD ₅	Seasonal Average Effluent Concentration	10
Total Suspended Solids	Seasonal Average Effluent Concentration	10

Effluent Monitoring Table

Sampling Location	Outlet from the communal Norweco Hydro-Kinetic Triple Model 4730 tertiary wastewater treatment system prior to discharged to the existing absorption trench leaching bed and a raised Type A dispersal bed
Frequency	Monthly during the operating season
Sample Type	Grab
Parameters	CBOD ₅ Total Suspended Solids

In accordance with Section 139 of the *Environmental Protection Act*, you may by written notice served upon me, the Ontario Land Tribunal and in accordance with Section 47 of the *Environmental Bill of Rights*, 1993, the Minister of the Environment, Conservation and Parks, within 15 days after receipt of this notice, require a hearing by the Tribunal. The Minister of the Environment, Conservation and Parks will place notice of your appeal on the Environmental Registry. Section 142 of the *Environmental Protection Act* provides that the notice requiring the hearing ("the Hearing") shall state:

- a. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
- b. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

1. The name of the appellant;
2. The address of the appellant;
3. The environmental compliance approval number;
4. The date of the environmental compliance approval;
5. The name of the Director, and;
6. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

Registrar*
Ontario Land Tribunal
655 Bay Street, Suite 1500
Toronto, Ontario
M5G 1E5
OLT.Registrar@ontario.ca

and

The Minister of the Environment,
Conservation and Parks
777 Bay Street, 5th Floor
Toronto, Ontario
M7A 2J3

and

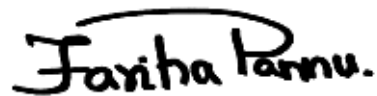

The Director appointed for the purposes of
Part II.1 of the *Environmental Protection Act*
Ministry of the Environment,
Conservation and Parks
135 St. Clair Avenue West, 1st Floor
Toronto, Ontario
M4V 1P5

*** Further information on the Ontario Land Tribunal's requirements for an appeal can be obtained directly from the Tribunal at: Tel: (416) 212-6349 or 1 (866) 448-2248, or www.olt.gov.on.ca**

This instrument is subject to Section 38 of the *Environmental Bill of Rights*, 1993, that allows residents of Ontario to seek leave to appeal the decision on this instrument. Residents of Ontario may seek leave to appeal within 15 days from the date this decision is placed on the Environmental Registry. By accessing the Environmental Registry at <https://ero.ontario.ca/>, you can determine when the leave to appeal period ends.

The above noted activity is approved under s.20.3 of Part II.1 of the *Environmental Protection Act*.

DATED AT TORONTO this 31st day of August, 2022

Fariha Pannu, P.Eng.

Director

appointed for the purposes of Part II.1 of the
Environmental Protection Act
