

ENVIRONMENTAL COMPLIANCE APPROVAL

NUMBER 6936-CJ4NRR
Issue Date: November 1, 2022

CAPREIT Apartments Inc.
11 Church St, No. 401
Toronto, Ontario
M5E 1W1

Site Location: Northglen Community
108 Grasslands Road, Township of Tisdale
City of Timmins,
P4N 8R9

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

the replacement of the existing subsurface sewage works for the collection, treatment and disposal of domestic sewage with a rated capacity of 77,000 litres per day, consisting of the following:

PROPOSED WORKS

PROPOSED TREATMENT SYSTEM:

- **Equalization Tank:** Two (2) equalization tank, each having a capacity of 34,000 L and equipped with a duplex pump, to receive sewage from existing sewage pump station and to pump dose 3,208 litres per hour to online sludge storage tanks described below.
- **Online Sludge Storage Tank/Primary Clarifier Tank:** Two (2) online sludge storage tank, each having a capacity of 45,500 L to allow solids to settle and separate from liquid fraction; discharging by gravity to one (1) 45,000 L primary clarifier for further clarification and to provide anoxic zone for de-nitrification prior to discharging to a biological treatment system described below.
- **Biological Treatment System:** Two (2) tanks representing Bioreactor No.1 (a two-compartment 23,000 L tank for BOD removal) and Bioreactor No.2 (a two-compartment 34,000 L tank for denitrification); both equipped with simplex blower and MBBR media.
- **Pump and Recirculation:** Two (2) simplex pumps integrated with Bioreactor No. 2 for dosing dosing to the post denitrification tank (*for future installation as contingency plan*) described below and recirculation of

wastewater to the online sludge storage tank.

- **Post Denitrification Tanks** (*provision for future contingency plan*): One (1) two-compartment 23,000 L Post Denitrification Tank equipped with 10.21 cubic metres of MBBR media and a carbon dosing system to further reduce nitrate and nitrite; discharging by gravity to a Tertiary Polisher Bioreactor described below.
- **Tertiary Polisher Bioreactor** (*provision for future contingency plan*): One (1) 34,000 L Tertiary Polisher Bioreactor equipped with one blower, 4.19 cubic metres of MBBR media and a 20 m tube diffuser.
- **Final Clarification Tank**: One (1) final clarifier with total capacity of approximately 34,000 L, to allow for sludge settling, transfer of settled sludge to the online Sludge Storage Tanks described above and transfer of treated effluent to the Final Pump Tank.
- **Final Pump Tank** (Effluent Pump Station): One (1) tank equipped with duplex pump and control panel to provide alternating time dosage of 3,208 litres per hour into respective pairs of pods of the inground absorption trench field described below, via two (2) – 50 mm diameter forcemains to one of two (2) distribution boxes.

PROPOSED DISPERSAL BED: In-Ground Absorption Trench Field

- Four (4) pods, each having 400 meters long absorption trenches providing a total of total 1600 meters of absorption trenching.
- Configuration of four (4) absorption trench field pods will include 16 runs of 25 meters long absorption trenches at 1.6 meter o/c, with 75 millimetre (3") diameter distribution piping (400 meters total) complete with a geotextile fabric covering the absorption trenches. Each run of distribution piping shall be installed with a uniform downward slope of 100 millimetre over the 25 meter trench lengths.

all in accordance with Supporting Documentation submitted to the Ministry as listed in **Schedule A** in this Approval.

For the purpose of this environmental compliance approval, the following definitions apply:

1. "Approval" means this entire Approval document and any Schedules to it, including the application and Supporting Documentation;
2. "BOD₅" (also known as TBOD₅) means five day biochemical oxygen demand measured in an unfiltered sample and includes carbonaceous and nitrogenous oxygen demand;
3. "CBOD₅" means five day carbonaceous (nitrification inhibited) biochemical oxygen demand measured in an unfiltered sample;
4. "Director" means a person appointed by the Minister pursuant to Section 5 of the EPA for the purposes of Part II.I of the EPA;

5. "Grab Sample" means an individual sample of at least 1000 millilitres collected in an appropriate container at a randomly selected time over a period of time not exceeding 15 minutes;
6. "District Manager" means the District Manager of the *Timmins office* of the Ministry;
7. "EPA" means the Environmental Protection Act, R.S.O. 1990, c.E.19, as amended;
8. "Licensed Engineering Practitioner" means a person who holds a licence, limited licence or temporary licence under the *Professional Engineers Act*, R.S.O. 1990, c. P.28;
9. "Ministry" means the ministry of the government of Ontario responsible for the EPA and OWRA and includes all officials, employees or other persons acting on its behalf;
10. "OBC" means the Ontario Building Code, Ontario Regulation 332/12 (Building Code) as amended to January 1, 2015, made under the *Building Code Act*, 1992, S.O. 1992, c. 23;
11. "Owner" means CAPREIT Apartments Inc. and its successors and assignees;
12. "OWRA" means the *Ontario Water Resources Act*, R.S.O. 1990, c. O.40, as amended;
13. "Rated Capacity" means maximum daily sanitary sewage flow for which the Works are approved to handle;
14. "Proposed Works" means those portions of the Works included in the Approval that are under construction or to be constructed; and
15. "Supporting Documentation" means the documents listed in Schedule A of this Approval;
16. "Works" means the approved sewage works, and includes Proposed Works.

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. GENERAL PROVISIONS

1. The Owner shall ensure that any person authorized to carry out work on or operate any aspect of the Works is notified of this Approval and the terms and conditions herein and shall take all reasonable measures to ensure any such person complies with the same.
2. The Owner shall design, construct, operate and maintain the Works in accordance with the conditions of this Approval.

3. Where there is a conflict between a provision of any document referred to in this Approval and the conditions of this Approval, the conditions in this Approval shall take precedence.

2. EXPIRY OF APPROVAL

1. This Approval will cease to apply to those parts of the Works which have not been constructed within **five (5) years** of the date of this Approval.

3. CHANGE OF OWNER

1. The Owner shall notify the District Manager and the Director, in writing, of any of the following changes within **thirty (30) days** of the change occurring:
 - a. change of address of Owner;
 - b. change of Owner, including address of new owner;
 - c. change of partners where the Owner is or at any time becomes a partnership, and a copy of the most recent declaration filed under the *Business Names Act*, R.S.O. 1990, c.B17 shall be included in the notification to the District Manager;
 - d. change of name of the corporation and a copy of the most current information filed under the *Corporations Informations Act*, R.S.O. 1990, c. C39 shall be included in the notification to the District Manager;
2. In the event of any change in ownership of the Works, other than a change to a successor municipality, the Owner shall notify in writing the succeeding owner of the existence of this Approval, and a copy of such notice shall be forwarded to the District Manager and the Director.
3. The Owner shall ensure that all communications made pursuant to this condition refer to the number of this Approval.

4. CONSTRUCTION

1. The Owner shall ensure that the construction of the Works is supervised by a Licensed Engineering Practitioner.
2. The Owner shall ensure that the Works are constructed such that minimum horizontal clearance distances as specified in the OBC are satisfied.
3. The Owner shall ensure that the **Moving Bed Biofilm Reactor (MBBR)** treatment system is installed in accordance with the Manufacturer's Installation Manual.
4. The Owner shall ensure that an imported soil that is required for construction of any subsurface disposal bed as per this Approval is tested and verified by the Licensed Engineering Practitioner for

the percolation time (T) prior to delivering to the site location and the written records are kept at the site.

5. Upon construction of the Works, the Owner shall prepare a statement, certified by a Licensed Engineering Practitioner, that the Works are constructed in accordance with this Approval, and upon request, shall make the written statement available for inspection by Ministry staff.
6. Upon construction of the Works, the Owner shall prepare a set of as-built drawings showing the Works "as constructed". "As-built" drawings shall be kept up to date through revisions undertaken from time to time and a copy shall be retained at the site for the operational life of the Works and shall be made available for inspection by Ministry staff.

5. MONITORING AND RECORDING

The Owner shall, upon commencement of operation of the Works, carry out the following monitoring program:

1. All samples and measurements taken for the purposes of this Approval are to be taken at a time and in a location characteristic of the quality and quantity of the effluent stream over the time period being monitored.
2. Samples shall be collected at the sampling point(s), at the sampling frequencies and using the sample type specified for each parameter listed in the Influent Monitoring Table included in **Schedule B**.
3. Samples shall be collected at the sampling point(s), at the sampling frequencies and using the sample type specified for each parameter listed in the Effluent Monitoring Table included in **Schedule B**.
4. The Owner shall employ measurement devices to accurately measure quantity of effluent being discharged to each individual subsurface disposal system, including but not limited to water/wastewater flow meters, event counters, running time clocks, or electronically controlled dosing, and shall record the daily volume of effluent being discharged to the subsurface disposal system.
5. The Owner shall ensure that flow of treated effluent discharged into the subsurface sewage system does not exceed 77,000 litres per day.
6. The methods and protocols for sampling, analysis and recording shall conform, in order of precedence, to the methods and protocols specified in the following documents and all analysis shall be conducted by a laboratory accredited to the ISO/IEC:17025 standard or as directed by the District Manager:
 - a. the Ministry's Procedure F-10-1, "Procedures for Sampling and Analysis Requirements for Municipal and Private Sewage Treatment Works (Liquid Waste Streams Only)", as amended from time to time by more recently published editions;

- b. the Ministry's publication "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater" (January 1999), ISBN 0-7778-1880-9, as amended from time to time by more recently published editions; and
 - c. the publication "Standard Methods for the Examination of Water and Wastewater" (21st edition), as amended from time to time by more recently published editions.
7. The Owner shall retain for a minimum of **five (5) years** from the date of their creation, all records and information related to or resulting from the monitoring activities required by this Approval.

6. EFFLUENT OBJECTIVES

1. The Owner shall design and undertake everything practicable to operate the Works in accordance with the following objectives:
 - a. Final Effluent parameters design objectives listed in the table(s) included in Schedule B.
 - b. Annual Average Daily Influent Flow is within the Rated Capacity of the Sewage Treatment Plant.
2. For the purposes of subsection (1):
 - a. The concentrations of CBOD5, and TSS named in Column 1 of Effluent Objectives Table listed in Schedule B, as measured at each monitoring event, should be compared to the corresponding concentration set out in Column 2 of Effluent Objectives Table listed in **Schedule B**.

7. OPERATIONS AND MAINTENANCE

1. The Owner shall ensure that, at all times, the Works and the related equipment and appurtenances used to achieve compliance with this Approval are properly operated and maintained. Proper operation and maintenance shall include effective performance, adequate funding, adequate staffing and training, including training in all procedures and other requirements of this Approval and the OWRA and regulations, adequate laboratory facilities, process controls and alarms and the use of process chemicals and other substances used in the Works.
2. The Owner shall prepare an operations manual within **six (6) months** of the introduction of sewage to the Works, that includes, but not necessarily limited to, the following information:
 - a. operating procedures for routine operation of all the Works;
 - b. inspection programs, including frequency of inspection, for all the Works and the methods or tests employed to detect when maintenance is necessary;
 - c. repair and maintenance programs, including the frequency of repair and maintenance for all

the Works; copies of maintenance contracts for any routine inspections & pump-outs should be included for all the tanks and treatment units;

- d. procedures for the inspection and calibration of monitoring equipment;
 - e. a spill prevention control and countermeasures plan, consisting of contingency plans and procedures for dealing with equipment breakdowns, potential spills and any other abnormal situations, including notification of the Spills Action Centre (SAC) and District Manager; and
 - f. procedures for receiving, responding and recording public complaints, including recording any follow-up actions taken.
3. The Owner shall maintain an up to date operations manual and make the manual readily accessible for reference at the Works for the operational life of the Works. Upon request, the Owner shall make the manual available to Ministry staff.
 4. The Owner shall, upon the construction, prepare and make available for inspection by Ministry staff, a maintenance agreement with the manufacturer for the treatment process/technology or its authorized agent. The maintenance agreement must be retained at the site and kept current for the operational life of the Works.
 5. The Owner shall ensure that all septic tanks are pumped out every 3-5 years or when the tank is 1/3 full of solids and the effluent filters are cleaned out at minimum once a year or more often if required.
 6. The Owner shall ensure that grass-cutting is maintained regularly over the subsurface disposal bed(s), and that adequate steps are taken to ensure that the area of the underground Works is protected from vehicle traffic.
 7. The Owner shall visually inspect the general area where Works are located for break-out once every month during the operating season.
 8. In the event a break-out is observed from a subsurface disposal bed, the Owner shall do the following:
 - a. sewage discharge to that subsurface disposal system shall be discontinued;
 - b. the incident shall be **immediately** reported verbally to the Spills Action Centre (SAC) at (416) 325-3000 or 1-800-268-6060;
 - c. submit a written report to the District Manager within **one (1) week** of the break-out;
 - d. access to the break-out area shall be restricted until remedial actions are complete;
 - e. during the time remedial actions are taking place the sewage generated at the site shall not be

allowed to discharge to the environment; and

- f. sewage generated at the site shall be safely collected and disposed of through a licensed waste hauler to an approved sewage disposal site.
9. The Owner shall employ for the overall operation of the Works a person who possesses the level of training and experience sufficient to allow safe and environmentally sound operation of the Works.
10. The Owner shall retain for a minimum of **five (5) years** from the date of their creation, all records and information related to or resulting from the operations and maintenance activities required by this Approval.

8. REPORTING

1. **One week** prior to the start up of the operation of the Works, the Owner shall notify the District Manager (in writing) of the pending start up date.
2. In addition to the obligations under Part X of the EPA and O. Reg. 675/98 (Classification and Exemption of Spills and Reporting of Discharges) made under the EPA, the Owner shall, within **fifteen (15) days** of the occurrence of any reportable spill as provided in Part X of the EPA and O. Reg. 675/98, submit a full written report of the occurrence to the District Manager describing the cause and discovery of the spill, clean-up and recovery measures taken, preventative measures to be taken and a schedule of implementation.
3. The Owner shall, upon request, make all manuals, plans, records, data, procedures and supporting documentation available to Ministry staff.
4. The Owner shall prepare and submit a performance report, on an annual basis, within **ninety (90) days** following the end of each operational season to the District Manager. The first such report shall cover the first annual period following the commencement of operation of the Works and subsequent reports shall cover successive annual periods following thereafter. The reports shall contain, but shall not be limited to, the following information:
 - a. a summary and description of efforts made and results achieved in meeting the Effluent Objectives of (Condition 6);
 - b. a review and assessment of performance of Works, including all treatment units and disposal beds;
 - c. a description of any operating problems encountered and corrective actions taken at all Works located at the property;
 - d. a record of all maintenance carried out on any major structure, equipment, apparatus, mechanism or thing forming part of all Works located at the property including but not limited to: records of maintenance inspections for the treatment system, records of septic tank

- effluent filters cleaning, records of septic tank pump-outs, records of sludge pump-outs accumulated from the treatment system, records of visual inspections of all disposal systems;
- e. a summary of any effluent quality assurance or control measures undertaken in the reporting period;
 - f. a summary and interpretation of all daily flow data and results achieved in not exceeding the maximum daily sewage flow discharged into each one of the subsurface disposal system;
 - g. a summary of any complaints received during the reporting period and any steps taken to address the complaints;
 - h. a summary of all spill or abnormal discharge events;
 - i. any other information the District Manager requires from time to time;

9. FINANCIAL ASSURANCE

1. Within ninety (90) days of issuance of this Approval, the Owner shall submit to the Director, Financial Assurance, as defined in Section 131 of the Act, for the amount of **three hundred sixty nine thousands nine hundred twelve dollars (\$369,912)**. This Financial Assurance shall be in a form acceptable to the Director and shall provide sufficient funds to pay for analysis, monitoring, clean-up and decommissioning of the Works.

10. RESPONSIBILITY AGREEMENT

1. The Owner shall take all reasonable steps to enter into a duly signed Municipal Responsibility Agreement with the City of Timmins within one (1) year of the issuance of this Approval in accordance with the Ministry Procedure D-5-2 entitled "Application of Municipal Responsibility for Communal Water and Sewage Services".
2. The Owner shall provide written confirmation that the Responsibility Agreement was entered into, including the effective date of the Responsibility Agreement, to the Director and the District Manager.

11. CERTIFICATE OF REQUIREMENT

1. Pursuant to Section 197 of the EPA, no person having an interest in the Property, shall deal with the Property in any way without first giving a copy of this Approval to each person acquiring an interest in the Property as a result of the dealing.
2. The Owner shall:
 - a. within **sixty (60) days** of the date of the issuance of this Approval, submit to the Director for their review, two copies of a completed Certificate of Requirement and a registerable description of the Property; and
 - b. within **ten (10) calendar days** of receiving the Certificate of Requirement authorized by the Director, register the Certificate of Requirement in the appropriate Land Registry Office on title to the Property and submit to the Director the duplicate registered copy immediately following registration.
3. For the purposes of this condition, Property shall mean the property located at 108 Grasslands Road, City of Timmins.

12. SITE SPECIFIC CONDITIONS

1. Within **three (3) months** from the issue date of this approval the owner shall submit to the District Manager an Assessment of Impact on Water Resources to the satisfaction of the Ministry that fulfills the information requirements and intent of Chapter 22 of the Ministry's "Design Guidelines for Sewage Works".
2. Within **three (3) months** from the issue date of this approval the owner shall submit to the District Manager a Groundwater Monitoring and Reporting plan to the satisfaction of the Ministry that fulfills the requirements and intent of Chapter 22 of the Ministry's "Design Guidelines for Sewage Works"
3. Within **three (3) months** from the issue date of this approval the owner shall submit to the District Manager a contingency plan that fulfills the requirements and intent of Chapter 22 of the Ministry's "Design Guidelines for Sewage Works" to ensure satisfaction of Reasonable Use Guideline B-7 for the duration of site operation.
4. Deadlines for conditions 1, 2 and 3 of this section (12. SITE SPECIFIC CONDITIONS) may be amended by the District Manager.

Schedule A

1. Environmental Compliance Approval Application for Private Sewage Works dated April 22, 2022 and signed by Leo Lau, Senior Director, Environmental and Health & Safety of CAPREIT Limited Partnership, including final plans, specifications and report prepared by Eric Gunnell P.Eng., of Gunnell Engineering Ltd.
2. Northglen Community Sewage System Design Report revised in May 2022 and signed by Eric Gunnell, P.Eng., on May 18, 2022.
3. Northglen Community Sewage System Design Report revised in August 2022 and signed by Eric Gunnell, P.Eng.

Schedule B

Influent Monitoring Table

Sampling Location	Equalization Tank
Frequency	Semi-annual (Spring and Fall)
Sample Type	Grab Sample
Parameters	BOD ₅ , Total Suspended Solids (TSS), Total Kjeldahl Nitrogen (TKN), Total Phosphorus (TP)

Effluent Monitoring Table

Sampling Location	On discharge from the final Treatment System upstream from subsurface disposal bed (effluent from the Moving Bed Biofilm Reactor)
Frequency	Quarterly
Sample Type	Grab Sample
Parameters	CBOD ₅ , Total Suspended Solids (TSS), Total Phosphorus (TP), Total Nitrogen (TN)

Effluent Objectives Table

Effluent Parameter (tested on outlet from the final Treatment Units System upstream the subsurface disposal bed)	Concentration Objective (milligrams per litre unless otherwise indicated)
CBOD5	10
Total Suspended Solids	10

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is imposed to ensure that the Works are built and operated in the manner in which they were described for review and upon which approval was granted. This condition is also included to emphasize the precedence of Conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review. The condition also advises the Owners their responsibility to notify any person they authorized to carry out work pursuant to this Approval the existence of this Approval.
2. Condition 2 is included to ensure that, when the Works are constructed, the Works will meet the standards that apply at the time of construction to ensure the ongoing protection of the environment.
3. Condition 3 is included to ensure that the Ministry records are kept accurate and current with respect to the approved Works and to ensure that subsequent owners of the Works are made aware of the Approval and continue to operate the Works in compliance with it.
4. Condition 4 is included to ensure that the Works are constructed, and may be operated and maintained such that the environment is protected and deterioration, loss, injury or damage to any person or property is prevented.
5. Condition 5 is included to enable the Owner to evaluate and demonstrate the performance of the Works, on a continual basis, so that the Works are properly operated and maintained at a level which is consistent with the design objectives specified in the Approval and that the Works does not cause any impairment to the receiving watercourse.
6. Condition 6 is imposed to establish non-enforceable effluent quality objectives which the Owner is obligated to use best efforts to strive towards on an ongoing basis. These objectives are to be used as a mechanism to trigger corrective action proactively and voluntarily before environmental impairment occurs.
7. Condition 7 is included to require that the Works be properly operated, maintained, and equipped such that the environment is protected. As well, the inclusion of an operations manual, maintenance agreement with the manufacturer for the treatment process/technology and a complete set of "as constructed" drawings governing all significant areas of operation, maintenance and repair is prepared, implemented and kept up-to-date by the owner and made available to the Ministry. Such information is an integral part of the operation of the Works. Its compilation and use should assist the Owner in staff training, in proper plant

operation and in identifying and planning for contingencies during possible abnormal conditions. The manual will also act as a benchmark for Ministry staff when reviewing the Owner's operation of the work.

8. Condition 8 is included to provide a performance record for future references, to ensure that the Ministry is made aware of problems as they arise, and to provide a compliance record for all the terms and conditions outlined in this Approval, so that the Ministry can work with the Owner in resolving any problems in a timely manner.
9. Condition 9 is included to ensure that the Owner provides financial assurance on an interim basis until a Municipal Responsibility Agreement can be negotiated and signed with the Municipality.
10. Condition 10 is included to ensure that there is a Municipal Responsibility Agreement in place between the Owner and the Municipality so that, in the event that the Owner is unable to continue to provide sewage service, the Municipality may be able to assume ownership and operation of the Works.
11. Condition 11 is included in order to require the Owner to give notice of this Approval to potential future owners of the property before the property is dealt with.
12. Condition 12 (1), (2) and (3) are included to ensure that appropriate environmental studies are completed and submitted to the Ministry for review which would normally have been required prior to the issuance of this ECA; condition 12 (4) is included to allow the Owner to request extension and the local District Office to consider the request if reasonable.

In accordance with Section 139 of the *Environmental Protection Act*, you may by written notice served upon me, the Ontario Land Tribunal and in accordance with Section 47 of the *Environmental Bill of Rights, 1993*, the Minister of the Environment, Conservation and Parks, within 15 days after receipt of this notice, require a hearing by the Tribunal. The Minister of the Environment, Conservation and Parks will place notice of your appeal on the Environmental Registry. Section 142 of the *Environmental Protection Act* provides that the notice requiring the hearing ("the Hearing") shall state:

- a. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
- b. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

1. The name of the appellant;
2. The address of the appellant;
3. The environmental compliance approval number;
4. The date of the environmental compliance approval;
5. The name of the Director, and;
6. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

Registrar*
Ontario Land Tribunal
655 Bay Street, Suite 1500
Toronto, Ontario

* **Further information on the Ontario Land Tribunal's requirements for an appeal can be obtained directly from the Tribunal at: Tel: (416) 212-6349 or 1 (866) 448-2248, or www.olt.gov.on.ca**

This instrument is subject to Section 38 of the *Environmental Bill of Rights*, 1993, that allows residents of Ontario to seek leave to appeal the decision on this instrument. Residents of Ontario may seek leave to appeal within 15 days from the date this decision is placed on the Environmental Registry. By accessing the Environmental Registry at <https://ero.ontario.ca/>, you can determine when the leave to appeal period ends.

The above noted activity is approved under s.20.3 of Part II.1 of the *Environmental Protection Act*.

DATED AT TORONTO this 1st day of November, 2022

Fariha Pannu, P.Eng.
Director
appointed for the purposes of Part II.1 of the
Environmental Protection Act
