2. Exploration Logistics and Detailed Information

Will explosives be used for any activity/activities? If yes describe in detail which activities require the explosives, where they will be stored, and any other relevant information.

No

What commodity or commodities are being sought in the work program?

Au, Cu, Zn, Pt, PGE

How will you be transporting personnel to the exploration site for all activities? Describe in detail.

Transportation via company passenger vehicles from Hwy 105, near Ear Falls, along existing logging roads in the Trout Lake Forest Management Area, including Wenesaga and Ben roads. Where logging roads/trails are not passable by highway passenger vehicles, 2 side-by-side ATVs along existing access trails, or new trails (as outlined on the property-scale map) may be utilized.

How will you be mobilizing/demobilizing equipment to and from the exploration site for all activities? Describe in detail.

Drills will be transported along the same route as personnel.

Transport trucks will be utilized to move drilling equipment along forestry roads as close to drill sites as possible. Off-road movement of drill will be accomplished by one of 2 methods, depending on the selected drill contractor:

- 1) One skid-mounted drill and one skid-mounted rod sloop to be towed by a bulldozer to each drill-site. OR
- 2) One track-mounted drill and one track-mounted rod sloop to self-propel to each drill-site

What type of equipment will you be using for all of the early exploration activities?

Drilling will be conducted using a Discovery EF 75 rig (or similar), weighing approx. 22,000 pounds. Fuel will be hauled in a double-walled slip tank. Mechanized stripping will be conducted with a bulldozer and/or excavator. A Wajax pump and channel saws will be used for washing and sampling.

What type of drilling will take place? (e.g. core drilling, reverse circulation)

Core drilling (NQ), producing a core of approximately 48 mm diameter, and leaving a hole of approximately 76 mm diameter in the bedrock.

Do you anticipate the removal of the drill casing?

Yes No

If yes, when will you be removing it?

Immediately 3 to 6 months 6 to 12 months 1 to 2 years

For the exploration activities you have selected in your early exploration submission please fill in the associated details (required for all activities proposed). *

Geophysical surveys requiring a generator ▶ Type of Survey _____

Line cutting ▶ Estimated total line length _____ metres

Mechanized Stripping ▶ Planned Number of stripped locations 4
Estimated total area of stripping 9900 square metres

Pitting and Trenching of Bedrock ▶ Planned Number of Pits/Trenches _____

Mechanized Drilling ▶ Planned drill hole diameter 4.8 centimetres
 1 - 5 pads
 6 - 10 pads
 11 - 15 pads
 16 - 20 pads
 > 20 pads

Please identify any non-prescribed activity/activities you will be undertaking to support the prescribed early exploration activity/activities

- Creating trails for the purposes of early exploration
- Creating roads for the purposes of early exploration
- Creating/setting up camp(s) to house personnel to perform your prescribed early exploration activities
Number of people in camp _____ Number of camps _____
- Ground geophysical surveys without a generator
- Airborne geophysical surveys

Are you planning to store fuel or other hazardous materials on the property? *

Yes No

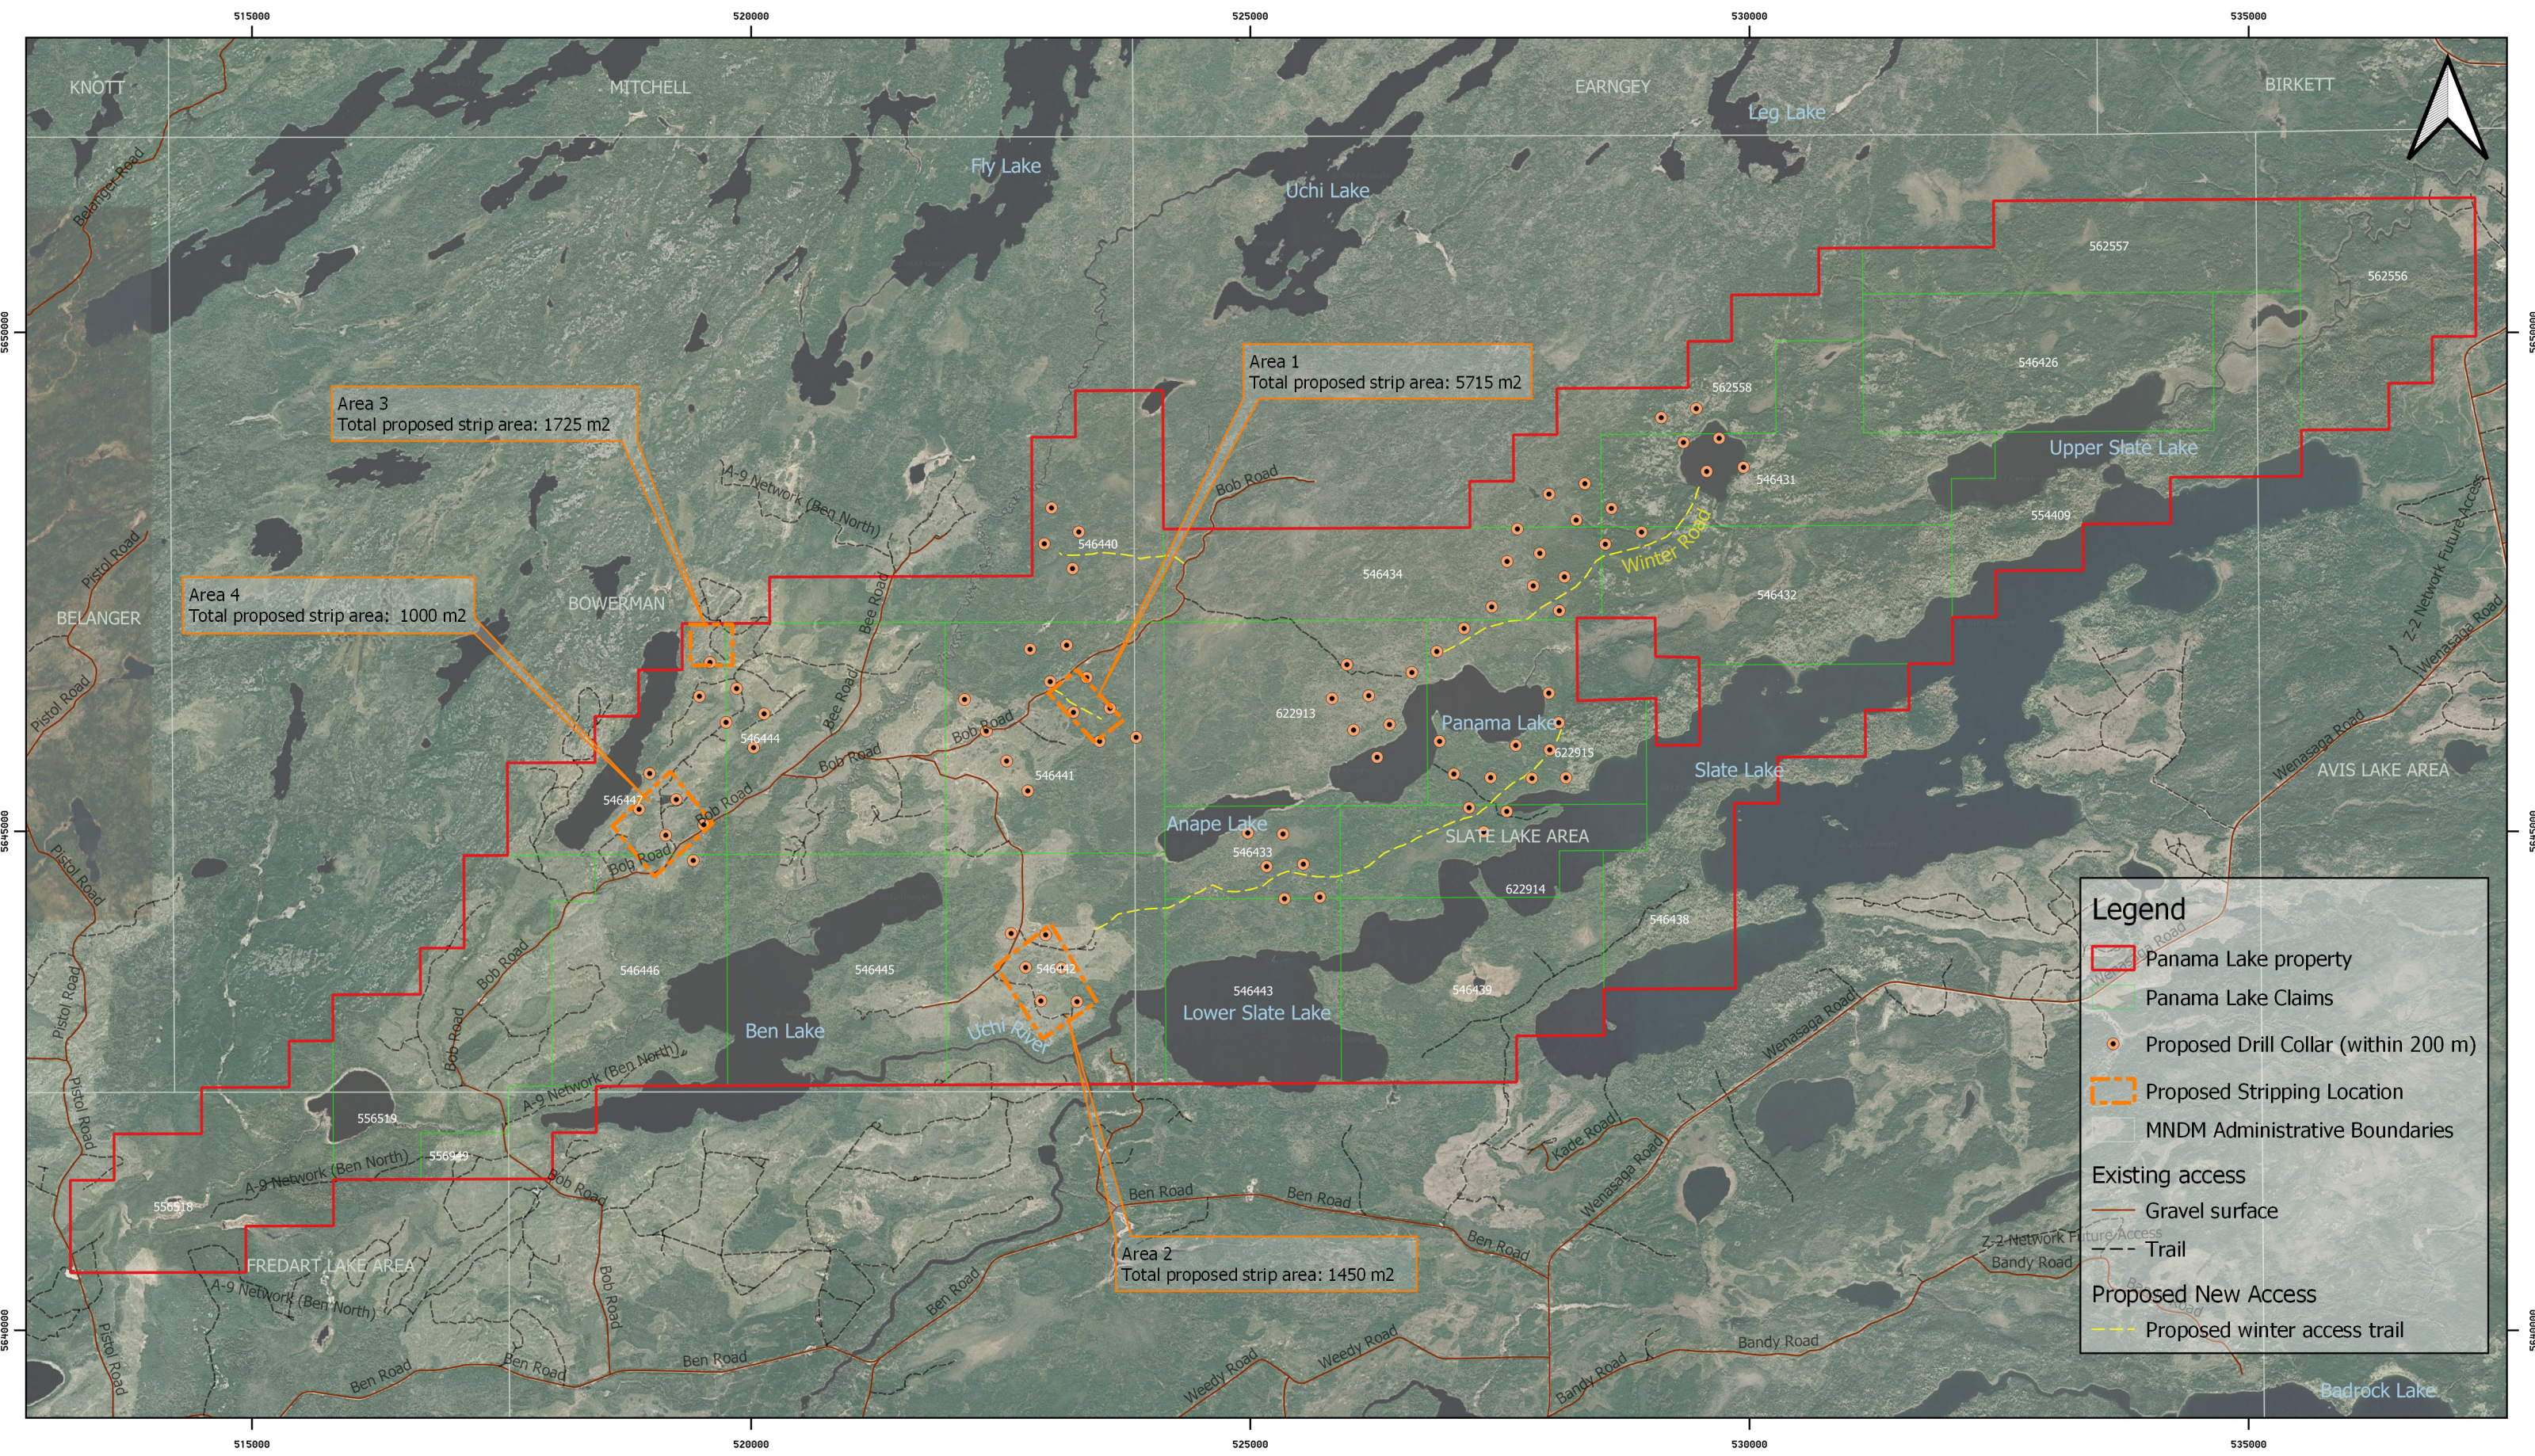

Please provide any other information relevant to this project.

Drilling and stripping programs to be staged and serviced from an established commercial accommodation. Some drill casing may be left in the ground, but if so, they will be clearly marked. The four strip areas outlined indicate general areas of stripping. Several small strip areas may be completed within each outlined location, but the total of all stripped areas will not exceed the total area indicated on the application.
