## 2. Exploration Logistics and Detailed Information

Will explosives be used for any activity/activities? If yes describe in detail which activities require the explosives, where they will be stored, and any other relevant information.

NO

What commodity or commodities are being sought in the work program?

Lithium, Cesium, Tantalum, Rubidium

How will you be transporting personnel to the exploration site for all activities? Describe in detail.

Exploration and diamond drilling crews will be traveling and accessing site entirely by pick-up trucks. Crews will be staying off site.

How will you be mobilizing/demobilizing equipment to and from the exploration site for all activities? Describe in detail.

Drilling Equipment mobilization and demobilization will be floated from its point of origin to the nearest accessible offload point at site. While onsite, all of the skidded equipment will be transported along the existing network of FSR's until at which point a bulldozer will be used to create small arms of exploration trails.

What type of equipment will you be using for all of the early exploration activities?

Trucks, Excavator (stripping) and diamond drilling activities will require the use of small bulldozer.

What type of drilling will take place? (e.g. core drilling, reverse circulation)  
All coring on the developed within this application will be diamond core

Do you anticipate the removal of the drill casing?

Yes  No

If yes, when will you be removing it?

Immediately  3 to 6 months  6 to 12 months  1 to 2 years

For the exploration activities you have selected in your early exploration submission please fill in the associated details (required for all activities proposed). \*
