Dear Rob MacLellan:

**Re: Application for Approval
Amendment to ECA No. 19-COR-55131 – Storage Lagoons
North Stormont Township, United Counties of Stormont, Dundas and Glengarry
Reference Number 4412-CF7JSR**

As requested in your email dated October 27, 2022, your application is considered withdrawn and the above-noted file is now closed.

If you wish to pursue your original proposal in the future, you will need to submit a new application complete with all required supporting information and appropriate application fee. The supporting information must include:

- Detailed engineering designs signed by an engineer for the storage lagoon.
- An odour assessment of the proposed lagoon that incorporates the cumulative effects of the existing lagoon.
- Groundwater monitoring program, trigger values and contingency plan for leakage from the lagoon.

The Ministry requires that the local Ministry Technical Support Section reviews and approves the odour assessment and groundwater monitoring program, trigger values and contingency plan, prior to submitting the application to the Director for review.

If you wish to pre-consult with the Ministry on this application the Ministry is available either through the local District Office or Senior Waste Engineer's contact information below.

We also emphasize that under section 20.2 of Part II.1 of the Environmental Protection Act, (Act) you are required to obtain an approval under section 20.3 of Part II.1 of the Act before construction, alteration, extension, replacement or change of use of a waste disposal site, including change of the type of waste handled at an approved site.

If you have any questions regarding the above, please contact Christopher Munro, Senior Waste Engineer at (437) 772-8538.

Yours truly,

Mohsen Keyvani, P.Eng.

Director

appointed for the purposes of Part II.1 of the *Environmental Protection Act*

CM/

c: District Manager, MECP Cornwall
