

**AMENDED ENVIRONMENTAL COMPLIANCE APPROVAL**

NUMBER 2702-CFFRPV  
Issue Date: October 28, 2024

SEJJ Environmental Solutions Inc.  
117 Toryork Drive  
Toronto, Ontario  
M9L 1X9

Site Location: SEJJ Environmental  
117 Toryork Drive  
City of Toronto  
M9L 1X9

*You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:*

amendment in the existing approval for establishment of stormwater management works for the collection, transmission, treatment and disposal of stormwater run off from the approximately 1.89 ha of 115/117 Toryork Drive and 0.0813 ha 49 Milvan Drive, both located in the City of Toronto, comprising;

**Proposed Works**

**Sediment Interceptor**

one sediment interceptor, with a volume of 5.85 cubic metre (2.286 m x 1.524 m x 1.678 m), located downstream of the impacted soils bays, designed to capture sediments, with an outlet pipe located at an invert elevation of 148.09 m, and located adjacent to Clean Soil Bays, and discharging to Proposed CBMH1;

**Hydroworks Oil/Grit Separator Unit, Model Hydrodome HD6**

one (1) oil and grit separator (OGS 1), Hydroworks Oil/Grit Separator Unit, Model Hydrodome HD6, designed to provide 66 % long term average Total Suspended Solids removal from approximately 1.879 ha area, located adjacent to Storage Tank 1, receiving stormwater run off from CBMH1, having a sediment capacity of 2900 litres, an oil capacity of 804 litres, a total holding capacity of 5200 litres and a maximum treatment flow rate of 96 L/s litres per second, discharging to Storage Tank 1, a Proposed CBMH1 that also receives run off from the clean soil storage bays and discharging to a Proposed underground Tank 1 through MHA1;

### Underground Storage Tank 1

One underground Storage Tank 1, designed to provide underground storage, located adjacent to HD6, receiving stormwater run off from the Proposed HD6, Tank 1, designed with a storage volume of 330.9m<sup>3</sup>, with tank floor at an invert elevation of 146.63m and outletting to Tank 2 through a pipe with an invert elevation of 146.69m;

### Underground Storage Tank 2

One underground Storage Tank 2, receiving stormwater from Tank 1, designed with a storage volume of 255.55m<sup>3</sup>, floor at an invert elevation of 146.63m outletting to an Oil/Grit Separator HF41 through an outlet pipe located at an invert elevation of 146.69m;

### Hydroworks Storm Water Treatment Unit Model Hydrofilter HF41

one (1) stormwater filtration unit Hydroworks Storm Water Treatment Unit Model Hydrofilter HF41, designed to provide stormwater filtration and 83 % long term average Total Suspended Solids removal from approximately 1.897 ha area, located adjacent to and downstream of Tank 2, having a sediment capacity of 1400 litres, an oil capacity of 1400 litres, a total holding capacity of 4270 litres and a maximum treatment flow rate of 32.3 litres per second, complete with a sampling port located in the downstream manhole MH2, discharging to City of Toronto's trunk storm sewer traversing through the subject property, through a Proposed STM MH2;

### Flow Control

one (1) orifice installed upstream of STM MH2 at an invert elevation of 147.42m, having a 283mm diameter, controlling the 2 to 100 year post development flow rate to 227.65 L/s, and resulting in an upstream storage of 575.80 m<sup>3</sup> under the 100 year storm event, being provided at the site in including Tank No. 1 and Tank No. 2; the post development controlled flow is being routed through the orifice to STM MH2 and ultimately to the City of Toronto Trunk Sewer;

including all other mechanical system, electrical system, instrumentation and control system, piping, pumps, valves and appurtenances essential for the proper, safe and reliable operation of the Works in accordance with this Approval, in the context of process performance and general principles of wastewater engineering only;

all in accordance with the Schedule A.

*For the purpose of this environmental compliance approval, the following definitions apply:*

1. "Approval" means this entire Environmental Compliance Approval and any Schedules attached to it;
1. "BOD5" (also known as TBOD5) means five day biochemical oxygen demand measured in an unfiltered sample and includes carbonaceous and nitrogenous oxygen demands;

2. "Director" means a person appointed by the Minister pursuant to section 5 of the EPA for the purposes of Part II.1 of the EPA;
3. "District Manager" means the District Manager of the appropriate local District Office of the Ministry, where the Works are geographically located;
4. "EPA" means the *Environmental Protection Act*, R.S.O. 1990, c.E.19, as amended;
5. "Licensed Engineering Practitioner" means a person who holds a licence, limited licence or temporary licence under the *Professional Engineers Act*, R.S.O. 1990, c. P.28;
6. "Ministry" means the ministry of the government of Ontario responsible for the EPA and OWRA and includes all officials, employees or other persons acting on its behalf;
7. "Owner" means SEJJ Environmental Solutions Inc., and its successors and assignees;
8. "OWRA" means the *Ontario Water Resources Act*, R.S.O. 1990, c. O.40, as amended;
9. "Proposed Works" means those portions of the Works included in the Approval that are under construction or to be constructed;
10. "Qualified Person" means a person who
  - a. holds a license, limited license or temporary license under the Professional Engineers Act, or
  - b. holds a certificate of registration under the Professional Geoscientists Act, 2000, and is a practicing member, temporary member, or limited member of the Association of Professional Geoscientists of Ontario or
  - c. has a degree in environmental science with relevant expertise, and,shall take professional responsibility for the content and the accuracy of the information submitted to the ministry.
11. "Works" means the approved sewage works, and includes Proposed Works.

*You are hereby notified that this environmental compliance approval is issued to you subject to the terms and conditions outlined below:*

## **TERMS AND CONDITIONS**

### **1. GENERAL CONDITION**

1. The Owner shall ensure that any person authorized to carry out work on or operate any aspect of the Works is notified of this Approval and the terms and conditions herein and shall take all reasonable measures to ensure any such person complies with the same.
2. The Owner shall design, construct, operate and maintain the Works in accordance with the conditions of this Approval.
3. Where there is a conflict between a provision of any document referred to in this Approval and the conditions of this Approval, the conditions in this Approval shall take precedence.
  - a. The issuance of, and compliance with the conditions of, this Approval does not:
    - i. relieve any person of any obligation to comply with any provision of any applicable statute, regulation or other legal requirement, including, but not limited to, the obligation to obtain approval from the local conservation authority necessary to construct or operate the Works; or
    - ii. limit in any way the authority of the Ministry to require certain steps be taken to require the Owner to furnish any further information related to compliance with this Approval.

### **2. EXPIRY OF APPROVAL**

1. This Approval will cease to apply to those parts of the Works which have not been constructed within **one (1) years** of the date of this Approval.
2. In the event that completion and commissioning of any portion of the Works is anticipated to be more than one (1) year, the Owner shall submit an application for extension at least **six (6) months** prior to the end of the one (1) year from the day of issuance of this Approval. The application shall include the reason(s) for the delay, whether there is any design change(s) and a review of whether the standards applicable at the time of Approval of the Works are still applicable at the time of request for extension, to ensure the ongoing protection of the environment.

### 3. CONSTRUCTION OF PROPOSED WORKS / RECORD DRAWINGS

1. Within thirty (30) days, upon the construction of the Works, the Owner shall prepare and submit to the District Manager, a statement, certified by a Licensed Engineering Practitioner, that the Works are constructed in accordance with this Approval.
2. Within **three (3) months** of the construction of the Proposed Works including Barrier Curb , a set of as-built drawings showing the Works “as constructed” shall be prepared. These drawings shall be kept up to date through revisions undertaken from time to time and a copy shall be retained at the Works for the operational life of the Works.
3. The Owner shall construct the “Proposed Barrier Curb” as shown on drawing titled "Interim Stormwater Plan" dated September 2023, prepared by SOSCIA Professional Engineers Inc, and submitted to the Ministry as part of an Interim Stormwater Management Plan.

### 3. CHANGE OF OWNER

1. The Owner shall notify the District Manager and the Director, in writing, of any of the following changes within **thirty (30) days** of the change occurring:
  - a. change of address of Owner;
  - b. change of Owner, including address of new owner;
  - c. change of partners where the Owner is or at any time becomes a partnership, and a copy of the most recent declaration filed under the *Business Names Act, R.S.O. 1990, c. B.17* shall be included in the notification; or
  - d. change of name of the corporation, and a copy of the most current information filed under the *Corporations Information Act, R.S.O. 1990, c. C39* shall be included in the notification.
2. In the event of any change in ownership of the Works, the Owner shall notify in writing the succeeding owner of the existence of this Approval, and a copy of such notice shall be forwarded to the District Manager and the Director.
3. The Owner shall ensure that all communications made pursuant to this condition refer to the number of this Approval.

#### 4. OPERATION AND MAINTENANCE

1. The Owner shall make all necessary investigations, take all necessary steps and obtain all necessary approvals so as to ensure that the physical structure, siting and operations of the Works do not constitute a safety, health or flooding hazard to the general public.
2. The Owner shall undertake an inspection of the condition of the Works, at least once a year, and undertake any necessary cleaning and maintenance to ensure that sediment, debris and excessive decaying vegetation are removed from the Works to prevent the excessive build-up of sediment, oil/grit, debris and/or decaying vegetation, to avoid reduction of the capacity and/or permeability of the Works, as applicable. The Owner shall also regularly inspect and clean out the inlet to and outlet from the Works to ensure that these are not obstructed.
3. The Owner shall construct, operate and maintain the Works with the objective that the effluent from the Works is essentially free of floating and settleable solids and does not contain oil or any other substance in amounts sufficient to create a visible film, sheen, foam or discoloration on the receiving waters.
4. The Owner shall carry out and maintain an inspection and maintenance program on the operation of the manhole oil/grit separator in accordance with the manufacturer's recommendation.
5. The Owner shall ensure that the manhole for the oil/grit separator remains accessible year-round to facilitate maintenance access and spill response measures.
6. The Owner shall ensure the immediate clean-out of the Works after a fuel or oil spill capture.
7. The Owner shall ensure that equipment and material for the containment, clean-up and disposal of fuel and oil and materials contaminated with such, is on hand and in good repair for immediate use in the event of:
  - a. loss of fuel or oil to the Works; or
  - b. a spill within the meaning of Part X of the EPA.
8. The Owner shall prepare an operations manual prior to the commencement of operation of the Works that includes, but is not necessarily limited to, the following information:
  - a. operating and maintenance procedures for routine operation of the Works;
  - b. inspection programs, including frequency of inspection, for the Works and the methods or tests employed to detect when maintenance is necessary;

- c. repair and maintenance programs, including the frequency of repair and maintenance for the Works;
  - d. contingency plans and procedures for dealing with potential abnormal situations and for notifying the District Manager; and
  - e. procedures for receiving, responding and recording public complaints, including recording any follow-up actions taken.
9. The Owner shall maintain an up to date operations manual and make the manual readily accessible for reference at the Works for the operational life of the Works. Upon request, the Owner shall make the manual available to Ministry staff.
10. The Owner shall maintain a logbook to record the results of these inspections and any cleaning and maintenance operations undertaken, and shall keep the logbook at the Works for inspection by the Ministry. The logbook shall include the following:
- a. the name of the Works;
  - b. the date and results of each inspection, maintenance and cleaning, including an estimate of the quantity of any materials removed and method of clean-out of the Works; and
  - c. the date of each spill within the catchment area, including follow-up actions and remedial measures undertaken.
11. The Owner shall submit the manufacturer's installation and operation recommendations (Condition 4.4) for Hydroworks Oil/Grit Separator and Hydroworks Treatment Unit to the District Manager within 30 days of the issuance of this Approval.
12. The Owner shall submit the operations manual (Condition 8) to the District Manager within 30 days of the issuance of this Approval.
13. The Owner shall retain for a minimum of **five (5) years** from the date of their creation, all records and information related to or resulting from the operation and maintenance activities required by this Approval.

## **5. EFFLUENT - VISUAL OBSERVATIONS**

The Owner shall ensure that the effluent from all discharges from the Works is essentially free of floating and settleable solids and does not contain oil or any other substance in amounts sufficient to create a visible film, sheen or foam on the receiving waters. The Owner shall ensure regular maintenance of equipment is undertaken and all spills are addressed appropriately.

## 6. EFFLUENT MONITORING

1. The Owner shall, upon commencement of operation of the Works, carry out a monitoring program, and all samples and measurements taken for the purposes of this Approval are to be taken at a time and in a location characteristic of the quality and quantity of the effluent stream over the time period being monitored.
2. Samples shall be collected and analyzed at the following sampling point(s), at the sampling frequencies and using the sample type specified for each parameter listed in the effluent monitoring table in **Schedule B**.
3. The methods and protocols for sampling, analysis, toxicity testing, and recording shall conform, in order of precedence, to the methods and protocols specified in the following:
  - a. the Ministry's publication "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater Version 2.0" (January 2016), PIBS 2724e02, as amended;
  - b. the publication "Standard Methods for the Examination of Water and Wastewater" (21st edition) as amended from time to time by more recently published editions;
  - c. for any parameters not mentioned in the documents referenced in Paragraphs 3.a and 3.b, the written approval of the District Manager shall be obtained prior to sampling.
4. The Owner shall retain for a minimum of **five (5) years** from the date of their creation, all records and information related to or resulting from the monitoring activities required by this Approval.
5. Samples shall be collected and analyzed at the following sampling point(s), at the sampling frequencies and using the sample type specified for each parameter listed in the effluent monitoring table in **Schedule B**.

## 7. EFFLUENT TRIGGERS AND CONTINGENCY PLAN

Upon commencement of operation of the Works, the Owner shall carry out the following Effluent Triggers and Contingency Plan.

- (1) The Owner shall compare the concentration of the effluent parameters pursuant to Condition 6, with the corresponding Trigger Concentration as per **Schedule C**.
- (2) In the event that a monitoring result for any of the parameters listed in the Schedule C exceeds its corresponding Trigger Concentration included in the Schedule C, the Owner shall;
  - (a) report the exceedance to the District Manager orally as soon as possible and in writing within seven (7) days of the exceedance;

(b) within 5 days, conduct a second round of sampling to confirm the exceedance noted previously.

(3) In the event that a Trigger Parameter exceeds the Trigger Concentration after the second round of sampling pursuant to Condition 7(2)(a) above;

a. the Owner shall cease the stormwater outflow from MH2 to to prevent stormwater discharge to the receiving municipal storm sewer.

b. In the event that an exceedance of a Trigger Concentration for any Trigger Parameter is confirmed, the Owner shall retain a Qualified Person in order to review the monitoring data and exceedances and prepare and submit a report to the District Manager as early as possible, in order to resume the stormwater discharge from MH2 to the receiving municipal storm sewer. The report shall include the following at a minimum;

i. recommendations to mitigate the exceedances in future

ii. a detailed implementation plan including timelines to achieve compliance and restore stormwater discharge to the receiving municipal storm sewer

iii. any other recommendations to improve the performance of treatment Works and amend any waste management practices on the site to prevent future exceedances

## **8. SEDIMENT AND EROSION CONTROL**

### **8.1 PRE-CONSTRUCTION SEDIMENT AND EROSION CONTROL**

- a. The Owner shall install and maintain pre-construction sediment and erosion control measures within 30 days of the issuance of this Approval.
- b. **One (1) week** prior to the start-up of the operation of the Pre-Construction Sediment and Erosion Controls, the Owner shall notify the District Manager (in writing) of the pending start-up date of these controls. The Owner shall also provide clear plan/drawing with this notification.
- c. The pre-construction sediment and erosion control measures shall continue to operate on the site until the time when stormwater management works have been constructed on the site. The Owner shall notify the District Manager 30 days prior to the removal of these measures.
- d. The Owner shall conduct inspection of the Sediment and Erosion control measures periodically, and after each significant storm event through a qualified person.

- e. The Owner shall maintain records of inspections and maintenance which shall be made available for inspection by the Ministry, upon request. The record shall include the name of the inspector, date of inspection, and the remedial measures, if any, undertaken to maintain the temporary sediment and erosion control measures.

## **8.2 TEMPORARY SEDIMENT AND EROSION CONTROL DURING CONSTRUCTION**

- a. The Owner shall install and maintain temporary sediment and erosion control measures during construction of the proposed works.
- b. **One (1) week** prior to the start-up of the operation of the Temporary Sediment and Erosion Controls, the Owner shall notify the District Manager (in writing) of the pending start-up date of these controls. The Owner shall also provide clear plan/drawing with this notification.
- c. The Owner shall install and maintain temporary sediment and erosion control measures during construction and conduct inspections **once every two (2) weeks** and after each significant storm event (a significant storm event is defined as a minimum of 25 millimetres of rain in any 24 hours period). The inspections and maintenance of the temporary sediment and erosion control measures shall continue until they are no longer required and at which time they shall be removed and all disturbed areas reinstated properly.
- d. The temporary, construction related sediment and erosion control measures shall continue to be on the site until they are no longer required and at which time they shall be removed and all disturbed areas reinstated properly.
- e. The Owner shall conduct inspection of the Sediment and Erosion control measures periodically, and after each significant storm event through a qualified person.
- f. The Owner shall maintain records of inspections and maintenance which shall be made available for inspection by the Ministry, upon request. The record shall include the name of the inspector, date of inspection, and the remedial measures, if any, undertaken to maintain the temporary sediment and erosion control measures.

## **8.3 PERMANENT SEDIMENT AND EROSION CONTROL**

- a. The Owner shall install and maintain permanent sediment and erosion control measures within 30 days of the construction of the stormwater management works.
- b. **One (1) week** prior to the start-up of the operation of the Permanent Sediment and Erosion Controls, the Owner shall notify the District Manager (in writing) of the pending start-up date of these controls. The Owner shall also provide clear plan/drawing with this notification.

- c. The Owner shall conduct inspection of the Sediment and Erosion control measures periodically, and after each significant storm event through a qualified person.
- d. The Owner shall maintain records of inspections and maintenance which shall be made available for inspection by the Ministry, upon request. The record shall include the name of the inspector, date of inspection, and the remedial measures, if any, undertaken to maintain the temporary sediment and erosion control measures.

## 9. REPORTING

1. **One (1) week** prior to the start-up of the operation of the Works, the Owner shall notify the District Manager (in writing) of the pending start-up date.
2. The Owner shall report to the District Manager orally **as soon as possible** any non-compliance with the Effluent Triggers, and in writing **within seven (7) days** of non-compliance.
3. The Owner shall, upon request, make all reports, manuals, plans, records, data, procedures and supporting documentation available to Ministry staff.
4. In addition to the obligations under Part X of the EPA and O. Reg. 675/98 (Classification and Exemption of Spills and Reporting of Discharges) made under the EPA, the Owner shall, within **fifteen (15) days** of the occurrence of any reportable spill as provided in Part X of the EPA and O. Reg. 675/98, submit a full written report of the occurrence to the District Manager describing the cause and discovery of the spill, clean-up and recovery measures taken, preventative measures to be taken and a schedule of implementation.
5. The Owner shall prepare performance reports on a calendar year basis by March 31 of the calendar year following the period being reported upon and submit to the District Manager upon request." The reports shall contain, but shall not be limited to, the following information pertaining to the reporting period:
  - a. a summary and interpretation of all monitoring data and a comparison to the Effluent Triggers outlined in Condition 7, including an overview of the success and adequacy of the Works;
  - b. a description of any operating problems encountered and corrective actions taken;
  - c. a summary of all maintenance carried out on any major structure, equipment, apparatus, mechanism or thing forming part of the Works, including an estimate of the quantity of any materials removed from the Works;
  - d. a summary of the calibration and maintenance carried out on all effluent monitoring equipment;
  - e. a summary of any effluent quality assurance or control measures undertaken in the reporting period;

- f. a summary of any complaints received during the reporting period and any steps taken to address the complaints;
- g. a summary of all spill or abnormal discharge events; and
- h. any other information the District Manager requires from time to time.

## 10. SPILL CONTINGENCY PLAN

1. Within **six (6) months** from the issuance of this Approval , the Owner shall implement a spill contingency plan - that is a set of procedures describing how to mitigate the impacts of a spill within the area serviced by the Works. The Owner shall, upon request, make this plan available to Ministry staff. This plan shall include as a minimum:
  - a. the name, job title and location (address) of the Owner, person in charge, management or person(s) in control of the facility;
  - b. the name, job title and 24-hour telephone number of the person(s) responsible for activating the spill contingency plan;
  - c. a site plan drawn to scale showing the facility, nearby buildings, streets, catch-basins and manholes, drainage patterns (including direction(s) of flow in storm sewers), any receiving body(ies) of water that could potentially be significantly impacted by a spill and any features which need to be taken into account in terms of potential impacts on access and response (including physical obstructions and location of response and clean-up equipment);
  - d. steps to be taken to report, contain, clean up and dispose of contaminants following a spill;
  - e. a listing of telephone numbers for: local clean-up company(ies) who may be called upon to assist in responding to spills; local emergency responders including health institution(s); and Ministry Spills Action Centre 1-800-268-6060;
  - f. Safety Data Sheets (SDS) for each hazardous material which may be transported or stored within the area serviced by the Works;
  - g. the means (internal corporate procedures) by which the spill contingency plan is activated;
  - h. a description of the spill response training provided to employees assigned to work in the area serviced by the Works, the date(s) on which the training was provided and by whom;
  - i. an inventory of response and clean-up equipment available to implement the spill contingency plan, location and, date of maintenance/replacement if warranted; and

- j. the date on which the contingency plan was prepared and subsequently, amended.
2. The Spill Contingency Plan shall be submitted to the District Manager within 30 days of the issuance of this Approval.
3. The spill contingency plan shall be kept in a conspicuous, readily accessible location on-site.
4. The spill contingency plan shall be amended from time to time as required by changes in the operation of the facility.

*The reasons for the imposition of these terms and conditions are as follows:*

1. Condition 1 is imposed to ensure that the Works are constructed and operated in the manner in which they were described and upon which approval was granted. This condition is also included to emphasize the precedence of conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review. Condition 1.4 is included to emphasize that the issuance of this Approval does not diminish any other statutory and regulatory obligations to which the Owner is subject in the construction, maintenance and operation of the Works. The Condition specifically highlights the need to obtain any necessary conservation authority approvals. The Condition also emphasizes the fact that this Approval doesn't limit the authority of the Ministry to require further information.
2. Condition 2 is included to ensure that, when the Works are constructed, the Works will meet the standards that apply at the time of construction to ensure the ongoing protection of the environment.
3. Condition 3 is included to ensure that the Ministry records are kept accurate and current with respect to the approved Works and to ensure that subsequent owners of the Works are made aware of the Approval and continue to operate the Works in compliance with it.
4. Condition 4 is included to ensure that the Works are constructed in accordance with the approval and that record drawings of the Works "as constructed" are maintained for future references.
5. Condition 5 and 7 are included ensure that the effluent discharged from the Works meets the Ministry's effluent quality requirements thus minimizing environmental impact on the receiver and to protect water quality, fish and other aquatic life in the receiving water body.
6. Condition 6 is included to require the Owner to demonstrate on a continual basis that the quality and quantity of the effluent from the approved Works is consistent with the design and effluent objectives specified in the Approval and that the approved Works does not cause any impairment to the receiving watercourse.

7. Condition 8 is included as regular inspection and necessary removal of sediment and excessive decaying vegetation from the Works are required to mitigate the impact of sediment, debris and/or decaying vegetation on the treatment capacity of the Works. The Condition also ensures that adequate storage is maintained in the Works at all times as required by the design. Furthermore, this Condition is included to ensure that the Works are operated and maintained to function as designed.
8. Condition 9 is included to provide a performance record for future references, to ensure that the Ministry is made aware of problems as they arise, and to provide a compliance record for all the terms and conditions outlined in this Approval, so that the Ministry can work with the Owner in resolving any problems in a timely manner.
9. Condition 10 is included to ensure that the Owner will implement the Spill Contingency Plan, such that the environment is protected and deterioration, loss, injury or damage to any person(s) or property is prevented.

## **SCHEDULE A**

1. Application for Approval of Municipal and Private Sewage Works dated March 16, 2022 and received on March 17, 2022.

**SCHEDULE B**

**Monitoring Program**

**Monthly Sampling Program for Final Effluent**

|   |
|---|
| <b>Sampling Locations:</b> CB1, MH2   |
| <b>Sampling Frequency:</b> Monthly  |
| <b>Sample Type:</b> Grab  |
| <b>Effluent Parameters:</b> TSS, BOD <sub>5</sub> , Total Phosphorus, Total Metals, Oil/Grease,<br>Conductivity*, pH* |

\*to be measured in the field at the time of sample collection

## SCHEDULE C

### EFFLUENT TRIGGER CONCENTRATIONS

| <b>Trigger Parameter</b><br>(tested on outlet from MH2) | <b>Trigger Concentration</b><br>(milligrams per litre unless otherwise indicated) |
|---|---|
| BOD5  | 15  |
| Total Suspended Solids                                  | 15  |

**Upon issuance of the environmental compliance approval, I hereby revoke Approval No(s). 6538-BBSKLS issued on November 24, 2019.**

In accordance with Section 139 of the *Environmental Protection Act*, you may by written notice served upon me, the Ontario Land Tribunal and in accordance with Section 47 of the *Environmental Bill of Rights*, 1993, the Minister of the Environment, Conservation and Parks, within 15 days after receipt of this notice, require a hearing by the Tribunal. The Minister of the Environment, Conservation and Parks will place notice of your appeal on the Environmental Registry. Section 142 of the *Environmental Protection Act* provides that the notice requiring the hearing ("the Notice") shall state:

- a. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
- b. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

Pursuant to subsection 139(3) of the *Environmental Protection Act*, a hearing may not be available with respect to any terms and conditions in this environmental compliance approval, if the terms and conditions are substantially the same as those contained in an approval that is amended or revoked by this environmental compliance approval.

The Notice should also include:

1. The name of the appellant;
2. The address of the appellant;
3. The environmental compliance approval number;
4. The date of the environmental compliance approval;
5. The name of the Director, and;
6. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

Registrar\*  
Ontario Land Tribunal  
655 Bay Street, Suite 1500  
Toronto, Ontario  
M5G 1E5  
OLT.Registrar@ontario.ca

and

The Minister of the Environment,  
Conservation and Parks  
777 Bay Street, 5th Floor  
Toronto, Ontario  
M7A 2J3

and

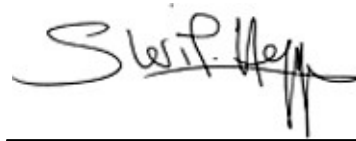

The Director appointed for the purposes of  
Part II.1 of the *Environmental Protection Act*  
Ministry of the Environment,  
Conservation and Parks  
135 St. Clair Avenue West, 1st Floor  
Toronto, Ontario  
M4V 1P5

\* Further information on the Ontario Land Tribunal's requirements for an appeal can be obtained directly from the Tribunal at: Tel: (416) 212-6349 or 1 (866) 448-2248, or [www.olt.gov.on.ca](http://www.olt.gov.on.ca)

This instrument is subject to Section 38 of the *Environmental Bill of Rights*, 1993, that allows residents of Ontario to seek leave to appeal the decision on this instrument. Residents of Ontario may seek leave to appeal within 15 days from the date this decision is placed on the Environmental Registry. By accessing the Environmental Registry at <https://ero.ontario.ca/>, you can determine when the leave to appeal period ends.

The above noted activity is approved under s.20.3 of Part II.1 of the *Environmental Protection Act*.

DATED AT TORONTO this 28th day of October, 2024

---

Sherif Hegazy, P.Eng.  
Director  
appointed for the purposes of Part II.1 of the  
*Environmental Protection Act*
