

July 31, 2020 - Petition Comments - No Name

Count	Location	Comment
1	M1B	"This is literally a few minutes walk from house. This should not be permitted near residential neighbourhoods! The noise pollution from the plant and the trucks is unacceptable."
2	M1B	"Don't want this in my neighborhood"
3	M1B	"I live off of Beechgrove and know this will definitely intrude on our quality of life."
4	M1B	"I love in the community and want to protect the area."
5	M1B	"It is a residential area"
6	M1B	"Why in the middle of residential areas? How is this even a consideration? The effect on air and noise pollution should be obvious and so too should the impact on traffic."
7	M1C	"I live in this community and I am very concerned about the potential routes these trucks will take through high pedestrian use areas. It's simply too dangerous."
8	M1C	"I don't want the traffic, pollution or waste in West Hill"
9	M1C	"This is my neighborhood!"
10	M1C	"Glad to see the community is getting involved in this fighting this monstrosity that will degrade the health, safety and quality of life of our entire neighbourhood. The organization behind the development has been working to start operations in stealth mode as if no one would notice and there's nothing anyone can do. So far political representatives have been reluctant to engage in support of constituents. My only concern with the petition is that it understates the consequences of the proposed operation to the area. The noise, pollution, health, safety and traffic issues are substantial and have not been evaluated at any level. This plan must be examined in the full light of day in the public domain and defeated or we will all pay a heavy price. It is quite clear that this operation is not appropriate for this location. My concerns also extend to the existing construction waste recycling that is ramping at the site. This operation is responsible for the increased heavy truck traffic on local streets"
11	M1C	"I live in this area and there is no reason to have such a plant built here."
12	M1C	"Not wanted on our area and more trucks"
13	M1C	"There is little doubt trucking to and from this project would put the residential areas and schools surrounding this site in Jeopardy."
14	M1C	"This area is already overrun with large trucks, which needs to be reduced as this is a residential community. Adding more trucks will be even more detrimental to our quality of life."
15	M1C	"Our neighbour hood is already a busy port to many industrial companies driving recklessly at outrageous speeds. We had to put up with an extended inconvenience of construction and smell to rehabilitate the tunnels for the water filtration system. Now on top of that we now have a huge volume of RATS in our properties, so the idea that a company will have lots of organic waste to help feed the rats in Unconscionable. The heavy traffic this plant will bring will then destroy our air quality and any sense of tranquility we have left!!!!"
16	M1C	"This area is too residential to add another facility. During this lockdown, the one area that people were able to enjoy was the waterfront. Having this facility will destroy this area. We need to do projects to beautify the area vs making is worse."
17	M1C	"I am thinking of my child and the pollution and noise. And we can't forget about how it will affect the housing prices."
18	M1C	"We don't need more garbage...thanks for the offer."
19	M1C	"This will create a lot of traffic for our community!"
20	M1C	"This is my neighborhood and we enjoy this area with my kids. It's be very disappointing to see this area go to waste. It has so much potential and there's a bird sanctuary nearby."
21	M1C	"I'm signing because Scarborough has contributed enough. Let's clean it up!"
22	M1C	"I already sent it to over 100 people living in the area. This project was kept very secret, many people had not heard of it."
23	M1C	"I am signing because a project such as this should not be in a residential area. this project should be adjacent to the end product manufacturing facility."

24	M1C	"This waste depot recovery and transfer plant needs to be located near the 400 series highways far from any residential areas. Not at the proposed site address 633 Coronation Drive which is 700 meters from homes, a school and a recreation centre!"
25	M1C	"Toxic and other wastes have no business near residential properties"
26	M1C	"Strongly opposed"
27	M1C	"We cannot have you destroying our habitat and disturbing our peace. Not to mention the health implications for the families that live here"
28	M1C	"This proposal would severely negatively affect the quality of life in this residential neighbourhood."
29	M1C	"The plant is too close to residential neighborhood."
30	M1C	"Dont want it in the neighborhood"
31	M1C	"I think that transporting via Port Union is a major disruption in such a small throughway to get to the 401. We already have major traffic via Port Union to get to the GO train and 100 trucks a day would caused major delays. Morningside would be the better option."
32	M1C	"This is way too close to residential homes!"
33	M1C	"Not appropriate for a residential community!!!"
34	M1C	"This will cause unnecessary traffic, noise and pollution in a lovely residential area ."
35	M1C	"Not in my backyard!"
36	M1C	"Terrible idea. A plant like this is of no benefit to the community. In fact it is detrimental to the health of our residents. A prime waterfront property such as this should be developed into a parkland for everyone's benefit. Waste processing can be sent out of Toronto into a low density area."
37	M1C	"We already have massive chemical plant in this area with bad history of pollution, fire,.....neighborhood safety should come first . There are many transfer site near by That can retool themselves with huge properly to be used for any needs."
38	M1C	"I don't want toxic waste and regular waste being dumped in my neighbourhood. Not to mention the hundreds of trucks traveling up and down my neighbourhood"
39	M1C	"Not wanted in our community."
40	M1C	"This is too close to a residential area and schools where traffic flow and access routes in and out of the neighbourhood are already limited. This volume of heavy trucks is dangerous, environmentally unsound and puts too much load on an already over subscribed infrastructure."
41	M1C	"I cannot believe that such a horrific proposal is even being considered."
42	M1C	"I live, walk, shop, and cycle in the area. During the summer months, the existing Highland Creek Treatment Plant already smells dreadfully. Anyone who uses the Port Union and Lawrence area in the summer will agree. I can only imagine the reeking odor those poor homeowners surrounding the proposed processing plant would have to put up with."
43	M1C	"Having many trucks filled with wet rotting waste driving through residential communities is not acceptable. This processing plant should be located in a rural area away from families."
44	M1C	"Absolutely ridiculous to have more toxins In this area and 200 +heavy trucks transporting this in a residential area"
45	M1C	"I am against the planed plant and heavy truck traffic."
46	M1C	"We already have the waste treatment plant in this neighbourhood. We do not want more noxious smells and we don't want the tremendous truck traffic going through our residential neighbourhood especially for the safety of children."
47	M1C	"Do not agree with this being so close to a residential neighborhood and parks"
48	M1C	"West Rouge is a peaceful community filled with people using the outdoor space to the fullest. We don't need pest issues and offensive sounds and odours to ruin the experience. Take this away to a more isolated location."

49	M1C	"The Ministry needs to delay the closing of comments until after the COVID-19 Emergency is over and a public meeting to explain the details of this project has been held. Alternatively, the Minister could intervene and instruct the applicant to relocate the proposed food waste and biogas plant to a larger industrial area at the north end of the City, where access to major 400 series highways can be achieved without travelling through residential areas. It makes no sense to build the largest green bin waste processing and biogas plant in the Province close to the Lake next to residential neighbourhoods and environmentally sensitive areas. Time to stop this proposal now!"
50	M1C	"Should not be in a residential neighbourhood. Roads currently can't handle the existing traffic. Would not be safe for the children going to and from several schools. My understanding is that there would be noise. This site is next to the waterfront trail. Doesn't make sense. Please find a more appropriate location!"
51	M1C	"This will create far too much heavy truck traffic through residential streets."
52	M1C	"I do not want this truck travelling in my neighbourhood!"
53	M1C	"Because the traffic study they are conducting is not an accurate picture of the amount of traffic we already have traveling North and South on Port Union Road. People are working from home we no longer have the huge amount of cars driving to and from the GO Station. Many students use the sidewalks and traffic lights for most of the year. This is a very small environmentally protected community surrounded by the Rouge Valley, Rouge River, Highland Creek and Lake Ontario. Small Family Population."
54	M1C	"I love our neighborhood and would like the air quality and safety of our families to remain as untouched as possible."
55	M1C	"I believe this project will cause immense pressure on non-existent infrastructure in suburban residential neighborhoods in the area. I am totally against this project."
56	M1C	"I strongly oppose this proposal which will be detrimental to the health and well being of the local community. It is hard to believe that such a facility would even be considered in a heavily residential location. I sincerely hope that the government reconsiders the location of this facility. Thank you."
57	M1C	"We made the decision on this years ago! No trucking waste through West Hill neighbourhood."
58	M1C	"What or who thought this plan up. I have lived in this area for 50 years. We went through the Johnstown Era and GE Era.. The land was saturated with chemicals that had to be trucked out. When our kids were attending Mowatt. Now your proposing a waste treatment plant and trucks by the hundreds coming into the area. Unfathomable. We only have one way in and out of our area and that is Port Union. To even consider all these truck moving waste into this area is ridiculous. We have a GO train station just one street east of Port Union. We have added numerous new parking lots which has increased traffic. At rush hour the residents living in the area have issues trying to get out. Due to fact that only one street leads to 401 and Hwy 2 when an accident occurs in the area or on the 401 everything stands still there is no way out. I very much oppose this."
59	M1C	"I live in what was once a quiet, clean area and want it to remain as in pre covid times. This is ridiculous."
60	M1C	"I'm signing this because I don't want this through the neighbourhood"
61	M1C	"A waste processing plant at this scale in the middle of a community is no acceptable especially without a public consultation and environmental and health assessment. This processing plant should be built away from residential areas. We as citizens are already exposed to many health hazards and don't need any new ones."
62	M1C	"I don't like to see huge traffic in our quiet neighborhood."
63	M1C	"I live in the neighbourhood; we don't need heavy trucks here."
64	M1C	"this area is too highly populated for any type of dump/waste site."
65	M1C	"Roadway arteries are not designed for this traffic scenario."

66	M1C	"The heavy industry proposed for 633 Coronation Drive that will process up to 2500 tonnes of waste each day should not be located near a residential neighbourhood. The plant will emit at least 6 toxic and greenhouse gasses including NOx, CH4, CO2, SO2, TRS particulate. I am concerned for the Health and Safety of my neighbours and myself. This processing and transfer facility should not be allowed to conduct business in our neighbourhood. We own the neighbourhood collectively and I am sure no one wants this near their home.I am against this proposal."
67	M1C	"Concern for the residents who live in the area. Not clear how the truck traffic will affect the community or the smells, spills, etc. Just all around bad idea in our community."
68	M1E	"We already have a problem with dump trucks on Coronation west of Morningside...even though this area is clearly marked that heavy trucks are not allowed."
69	M1E	"This is not the place for this type of plant in a residential area and on the edge of Lake Ontario"
70	M1E	"I'm. Local home owner and do not want the smell and added traffic of large trucks in the neighborhood."
71	M1E	"Enough is enough! There is already a sewage plant, chemical plants and a nuclear power plant within 10 km. This is a neighbourhood with families, schools, and expansive green spaces with stressed ecosystems. For the safety and health of thousands of residents calling this place home I implore you to end this proposal. NIMBY!!!"
72	M1E	"This is a residential area"
73	M1E	"This is just too close to residential. There are many other areas that are better suited."
74	M1E	"Please don't spoil our wonderful community!!!"
75	M1E	"I live nearby"
76	M1E	"The sewage treatment plant is more than enough waste in this area!"
77	M1E	"The idea of this many trucks going through a residential neighbourhood that already has a lot of trucks going through it is bad for the community. They not only bring noise, but the smell they would bring is significant. About 4 years ago we fought against a possible plan to ship sewage waste from the base of Beechgrove after the proposed closing the the sewage incinerator. It was decided at that time that having that many trucks going through the neighbourhood would be bad for the environment (both smell and noise and air pollution caused by large diesel trucks). What has changed? Nothing. It wasn't right then and it isn't right now."
78	M1E	"Our home backs on to Port Union Rd. and in the front of us we have 2 schoolyard so having that many trucks with so much pollution will definitely impact us negatively. We say no to any more truck traffic, odour, noise and harmful gas emissions."
79	M1E	"I don't want this in our community!"
80	M1E	"This is near a residential area. The the noise from this facility currently is unacceptable. Every night, when trying to sleep, we can hear a "drone/hum" like sound."
81	M1E	"I live in the neighborhood. I'd like to retire in the neighbourhood. There are other places this can be deposited and not in anyone's backyard. ."
82	M1E	"This is an unacceptable plan that would be an enormous burden to our residential roads and community."
83	M1E	"I have lived in Scarborough for a number of years.I am totally opposed to the proposed Waste Processing Depot.I am very concerned about the environmental and safety issues that will adversely impact the residents in the West Hill and"
84	M1E	"I am a resident of Scarborough.I am totally opposed to the proposed Waste Processing Depot.I am very concerned about the environmental and safety issues that will adversely impact the residents in the area."

85	M1E	"The proposed facility at 633 Coronation Drive in Scarborough is located very close to residential neighbourhoods and natural spaces with abundant flora and fauna. The dangerous operations and output of this facility would not only compound the existing hazards of the adjacent commercial-industrial complex, but would also threaten and adversely affect the quality of life for individuals who live in, and the natural environment—the air, the water, the soil, the plant life, the wildlife--that thrives in, the surrounding area. The release of noxious gaseous emissions and foul odours; a parade of trucks hauling four types of waste along confined roads to and from the facility; undue pressure placed on, and a greater risk to, existing higher-volume vehicular and pedestrian traffic; and noise pollution. The list is long for the havoc that this facility could inflict around the clock, 365 days per year. The facility in this location must be rejected and relocated if not halted altogether. All things considered"
86	M1E	"We moved to West Hill several years ago to start a family; our children are now growing and starting to explore the many parks and green spaces that adorn the area, and the neighbourhood has grown to cater to young families. To nestle a waste processing facility in the heart of this thriving community runs directly counter to its present needs. This section of Coronation Drive is dotted with facilities where young children learn gymnastics, how to swim, dance, and practice karate - to name a few. The increase in truck traffic alone brings unwanted (and sometimes, tragic) risks. This is to say nothing of the noise, odors, and countless potential health hazards of operating a 24/7 waste processing facility. Deny this application and find a better location for this facility."
87	M1E	"There must be better places along and close to the 401 for this processing plant. In any case, no one has mentioned spillage along the truck routes as there surely will be!"
88	M1E	"This is a beautiful dense family neighbourhood. The increase in large trucks moving through this area will be dangerous since it passes multiple schools and a university where children need to walk. It is already busy enough. The potential smell will affect homeowners enjoyment of their own yards. Not to mention the potential danger to people's health in close proximity to a dense neighbourhood. Since there is already a treatment facility in the area, share the love and consider another location that isn't settled in a neighbourhood. Also in light of covid, poor taste to push this through without an opportunity for the community to be consulted."
89	M1E	"We love our community and need to protect it for our children and grandchildren!"
90	M1E	"I am signing because this development appears severely detrimental to a residential area. The volume of trucks and waste appear to be excessive in the extreme for one site. I am concerned that insufficient care has been undertaken in reviewing this proposal and lack of community input has been solicited."
91	M1E	"No trucking please, it's right I'm the rail try building another side loading track. Much cheaper and more efficient."
92	M1E	"We already have noise and smells from the factories around Coronation. It's not fair to add more to this area. Additional large trucks around these residential streets is a big NO."
93	M1E	"I have lived in this area for 47 years I remember the smell as a child we would get coming from there, before regulations changed. Think about the impact in this area. We have Creeks, Lake Ontario, wildlife, schools, businesses, Residents this will all impact. This is a wonderful area with all the parks etc. Please take a closer look at what this will do to our environment in the years to come. How would you like this in your neighborhood."
94	M1E	"It is absolutely disgraceful to locate a heavy plant such as this in a residential area. The tripling of heavy trucks, all hours of the day with noxious gasses and orders so close to schools and residential homes is simply unacceptable. There are many brown field sites already available for such an enterprise. How can this possibly be acceptable? Quite simply it is not."
95	M1E	"I really don't think this is gonna do any good than bad. This factory plant will only worsen the environment and increase global warming. Kindly prevent this from happening"

96	M1E	"I do not support the expansion of plants in this industrial park by the Scarborough bluffs. This area is already burdened with hazardous air pollutants (See the NPRI data at pollution-waste.canada.ca). It is time to phase out many of ,the ageing chemical plants that are still operating and replace them with parkland. What comes next? Converting Colonel Danforth park into a service road for this complex to handle the truck traffic?"
97	M1E	"I have lived here my entire life. My son now lives here. We love walking down to the beach at the end of the road. There is already a sewage plant there. We don't need another dump. The beautiful water and beachfront will no longer be beautiful."
98	M1E	"Heard there was a better location for this type of processing plant near the "Bridal Path.""
99	M1E	"Please reject this proposal. This makes little sense for this community based on these facts. Thank you"
100	M1E	"I live in the area"
101	M1E	"I am signing as I don't want our neighbourhood polluted with gases and excessive noise"
102	M1E	"I am a resident in the area at Manse Road and coronation dr. For over 18 years. We DO NOT NEED A WASTE DISPOSAL SITE. It's bad enough that we already have a Chemical plant that releases toxic's in the air."
103	M1E	"This is not an appropriate location with residents living so close by. Please choose a location farther away from dense residential areas."
104	M1E	"Proposed location is far too close to residential area."
105	M1E	"We don't need another dump. We definitely don't need one close to where we live."
106	M1E	"I hate the smell of garbage"
107	M1E	"This seems poorly thoughtout and potentially damaging the health of residents In obvious ways but also by impacting their sleep and peace of mind. Furthermore, it most certainly will have a negative impact o their property values!"
108	M1E	"When I see a proposal "to develop a private waste processing and transfer plant", I immediately raise a red flag. Private, as opposed to private/public partnerships generally work on the profit model instead of the desperately needed environment model."
109	M1E	"I do not want this in my neighbourhood, near our outdoor space, air quality, noise pollution, increased traffic, harmful to my quality of life. I'm a taxpayer and demand this plan cease immediately."
110	M1E	"The impact to our neighbourhood will be devastating. It says we must write to express any concerns is that still the best approach considering the time constraints how can we best have our voices heard. I found out about this about an hour ago"
111	M1E	"It is too close to the waterfront trail, schools, parks and houses. It does not make sense in this location."
112	M1E	"We have many children and schools in this residential neighbourhood. It is not designed for this type of activity. There is already more noise and traffic than the streets were meant to handle. Adding even more noxious smell than we already have from the water treatment plant would be too much for this small neighbourhood."
113	M1E	"The deadline to submit your comments to the Environmental Registry of Ontario has been extended to July 31st. ero#019-1444 and ero#019-1446. I live in this neighborhood and I want our community and our environment protected, healthy and safe. ❤️"
114	M1E	"Prevent environmental damage to our neighbourhood from >200 heavy trucks per day transporting waste in and out of West Hill 24/7/365, resulting in the production of significant noxious gas emissions and raising neighbourhood noise/safety concerns."
115	M1E	"We live in this area. Reject this proposal."
116	M1E	"There are schools, homes and parks in this neighborhood. The smell and the non-stop trucking is sometimes terrible. Please don't make this even worse for our neighborhood."
117	M1E	"We live in the area and are opposed to this project. As seniors we have enough physical problems and don't need these gasses in our lungs."
118	M1E	"This is a residential area and under no circumstances should this plant be located on Coronation Dr. with up to 100 trucks a day driving through our community. Not to mention the concerns over toxic biosolids."

119	M1E	"It is unthinkable to allow this type of operation in such close proximity to a residential community."
120	M1E	"Environmental impact"
121	M1E	"Are you frick'n Insane? We already have a problem with big rig trucks going up and down our "supposed" quiet streets at all hours of the night... imagine 100 more carrying organic waste?!?!?! The smell alone would be insane as this stupid order to have it in our neighborhood! Plz sign this petition thank you!"
122	M1E	"I am against this due my compromised breathing due to COPD"
123	M1E	"Don't want no waste company in my area! To many trucks ruin are road anyways! Plus not safe with all the school zones in this area! Pick and area with no homes or schools!"
124	M1E	"I am signing because of the projected increased traffic on local streets and the impact the facility will have on the environment. Not to mention the increased amount of garbage that will end up in local wood lots and water front"
125	M1E	"This proposal is inappropriate for a highly residential area, with roads that were not meant for high volume traffic. The noise and fumes from so many trucks passing will be harmful to the quality of life for nearby residents. Not to mention the potential for smells!"
126	M1E	"A plant of this kind should NOT be anywhere near residential areas. There are already more then enough large loud trucks going up and down Manse and Coronation 24/7 (passing by schools and many homes)."
127	M1E	"I live down the street. No way!! We don't want that near our families near anything like this."
128	M1E	"Supporting my awesome husband, and my neighbours to protect the health of our beautiful neighbourhood, the children, schools, parks and businesses. Thank you for supporting this petition!"
129	M1E	"I don't want this going on in my neighbourhood"
130	M1E	"I am signing this petition because... although I know getting rid of waste is needed, I think investing in proper recycling and green disposal methods are needed instead!"
131	M1E	"We don't need that kind of traffic passing through our community."
132	M1E	"I enjoy my air quality and the nature in the area this will greatly decrease the health of locals in the air and ruin some key breeding grounds of local wildlife"
133	M1E	"I do not agree with the proposal, while Coronation Drive is industrial, all access to it is residential. Distance to the 401 is over 5 KM, and it's all residential. A better location might be close to Hwy 400 which is largely zoned industrial/commercial."
134	M1E	"This morning, I witnessed about 20 trucks going both ways down Manse Rd. alone. I cannot fathom how congested the area where our children play and go to school will be from trucks cutting across intersecting roads to get to this new site more quickly. Even if there were only a minimal environmental impact toward our health and safety, there is the congestion in the community that needs to be addressed--our little side roads aren't suitable for large trucks."
135	M1E	"Traffic issues aside, I would also like to say that I don't want my newborn to develop and suffer from respiratory illness or to have her children, one day suffer from birth defects. There is no conclusive evidence to suggest that this would be the case; however, how could I chance it? I don't want to be driven out of our home. So thank you, all for signing."
136	M1E	"Over the past couple of years, truck traffic has increased on Manse Road and Coronation Rd east of Manse. Manse is relatively narrow road, and trucks frequently cross into oncoming traffic and block lanes when making the turn from Lawrence southbound. The route has several townhouse complexes, many single family homes, a community centre, a baseball diamond and a K - 8 school that is on the city's 'Model Schools for Inner Cities' program... meaning that the school community already faces special challenges. This is a 'Community Safety Zone' for all it's worth, but that doesn't prevent the speeding. The road is uneven, and the sound of heavy trucks on the rutted road combined with the air brakes and large engines of the heavy trucks means that there is rarely quiet in this mostly residential neighbourhood. The noise and pollution from the trucking, both night and day, adversely affect the community and by extension, the children attending this school. Many live in the adjacent townhouse complexes and have bedr"

137	M1E	"As someone involved in construction, i deal with waste disposal sites on regular basis and never through my experince have i come across a waste facility that's planned to be located that close to residential area. As a resident of coronation drive, me and my family petition against the approval of this facility."
138	M1E	"I live on Satok, a residential area with kids and pets. I don't want hundreds of trucks on beechgrove day and night. There are enough carcinogens on coronation now. NO MORE."
139	M1E	"I do not consider this a safe project to have near a school or homes."
140	M1G	"I do not support this proposal."
141	M1G	"We already have heavy trucks carrying chemicals day and night down our residential street (always above the speed limit) right through an elementary school zone, past a community centre, and several townhouse complexes... the noise and pollution is already too much for a high population area like this. The chemical plants were built long before this became such a dense community, but even their presence should be reconsidered based on the new demographics."
142	Toronto	"This operation is not suited for the neighborhood. Also it's too close to Lake Ontario"
143	Toronto	"It is much too close to residential area!"
144	Toronto	"It will mess up the naberhood and everything else i just read !"
145	Toronto	"I live close to the area. I do all that I can to prevent environmental damage to my community. I know that noise and safety are a large concern. Our neighborhoods and neighborhood roads are not built for this purpose. A health study needs to be conducted for so many reasons."
146	Toronto	"I believe the proposed processing plant is much too close to residential property and should be relocated to a more remote area!"
147	Toronto	"Protect this area from this pollution and degradation this project will cause. Nix the project."
148	Toronto	"It's the right thing to do"
149	Toronto	"The proposed site is just too close to residential neighborhoods."
150	Toronto	"I don't want this in my Community!!"
151	Toronto	"I Want a safe environment and place to live"
152	Toronto	"Not enough studies and consultation have been made and the mail came in just before covid pandemic. We already have factories in coronation and had our fair share of pollution. Please no more bio or more dump sites."
153	Toronto	"I live right here."
154	Toronto	"This is far too close to the lake...we already have a problem with contaminants in the lake..and building this so close is asinine . The trucks into this area must go through residential neighbourhoods to access this site...and this area was not built for this. Build this out in the country away from any homes and built up areas. In the future if people want to build homes there, they already know what they are building near. This must not happen."
155	Toronto	"This is completely unacceptable; our residential neighbourhood is not a suitable location for this. Residents should not have their safety put at risk nor their homes be disrupted by constant noise."
156	Toronto	"I do not agree with this Waste/Biogas facility being so close to a residential neighbourhood and the Rouge conservation park and on the bike path! This will have a direct and detrimental effect on health, liveability and property values."
157	Toronto	"That area is one of the few gems left in the city."
158	Toronto	"This location is not suitable to be so close to the lake and the homes in this area. There must be another location which is more industrial and not near Homes."
159	Toronto	"My mother lives off of Beechgrove and this directly impacts their quality of life. The addition of over 100 trucks using that road per day is a major safety issue on an already very busy street."
160	Toronto	"This stinks."
161	Toronto	"I live in this neighborhood."
162	Toronto	"I live in the neighbourhood and care about the neighbourhood!"
163	Toronto	"It is crazy to consider establishing such an impactful facility so close to residential properties."
164	Toronto	"This is despicable"
165	Toronto	"I don't want toxic waste chemical clouds in my residential neighborhood , it's a health hazard"

166	Toronto	"This does not belong so close to a residential neighbourhood"
167	Toronto	"I'm thinking about the safety of my child, extra noise, and pollution generated in my area. Not to mention the obvious drop in housing prices."
168	Toronto	"Our neighborhoods should have clean air, especially for our children."
169	Toronto	"There is enough treatment plants by the lake already."
170	Toronto	"I'm signing because the health of all the people, in the neighborhoods affected, are at risk for serious health issues if this goes through. As well, was there an environmental risk assessment performed & were the residents informed and offered a chance to speak at a town hall??"
171	Toronto	"Environmental damage to neighbourhood"
172	Toronto	"This is not good for the environment"
173	Toronto	"I live in the neighborhood and I'm concerned about air pollution as well as infrastructure issues due to increased traffic from trucks."
174	Toronto	"Noise, vehicle and other pollution caused by this site outweighs any potential benefits. Has an environmental impact assessment been completed and what are the potential health impacts to the broader community."
175	Toronto	"I care about the location where I live with my family"
176	Toronto	"I am Totally against this Awful Project. Yet another Dumpster for Scarborough. How about a Project that Beautifies Scarborough which in case you didn't know has One Third of the Land Mass of Toronto but Nooooo Infrastructure and all that is thought of is building a Dumpster! As per usual just the Scraps for Scarborough."
177	Toronto	"This is a quiet residential area adjacent to sensitive area rouge valley and Lake Ontario. This is a horrible plan and must be stopped. My senior father 96 and sister and brother in law live in this area. No one wants hundreds of big noisy trucks with toxic garbage running through their streets where children play, seniors walk and dogs walk daily. Rethink this plan. Scrap this plan."
178	Toronto	"you cannot destroy people communities when other options are available just for profit business"
179	Toronto	"This site is much too close to too many people. What conversation has been had with those affected by this site?"
180	Toronto	"This plant shouldn't be located so close to residential areas."
181	Toronto	"Concerned about noise and safety in this community along with noxious gas emissions."
182	Toronto	"Not enough community consultation has been done."
183	Toronto	"No way this should be so close to homes and schools. Bad enough already with all the industry in the area and the sewage processing plant. Enough is enough."
184	Toronto	"I am one of the residents living very close to the Coronation area. I greatly oppose this action. We already deal with significant volumes of trucks due to the existing factories. I am very concerned about additional traffic and noise."
185	Toronto	"Do not want waste disposal site in our neighbourhood."
186	Toronto	"I'm signing as this is too close to neighbourhoods, schools, waterfront and residential streets"
187	Toronto	"Too close to residential and schools"
188	Toronto	"This is an inappropriate land use considering Emissions from the proposed facility in such close proximity to residential and schools. Further, the sheer volume of heavy trucks, all day, everyday, traveling through the residential community and past school zones, is grossly irresponsible, unsafe and demonstrates poor or a complete lack of judgment."
189	Toronto	"This should not be near peoples homes!!"
190	Toronto	"I do not want a waste management facility to allow hundreds of new trucks to import and export hundreds of tons of waste in a community surrounded by residences and schools."
191	Toronto	"200 Heavy trucks in residential neighborhoods is totally out of the question. This proposed facility should never have even reached this stage for discussion. Our members in government need to take a second look on their thinking that this was even considered."
192	Toronto	"The proposed location is too close to the waterfront trail, schools, parks and houses. Smell from Highland Creek Treatment Plant during warm months are already unbearable."

193	Toronto	"we already have so many bad air days in westhill with the sewage plant .having another company contributing to even more bad air days does not sound good at all ."
194	Toronto	"Further information should be provided to residents in the area. It is a small area surrounded by nature. This development would impact the community greatly and should be considered with input from residents."
195	Toronto	"Don't want this in our neighbourhood. Having this plant will bring down the value of our properties."
196	Toronto	"This is disturbing knowing how many residents and schools are located within close proximity."
197	Toronto	"There are already too many large transport trucks going up and down Manse Road past Joseph Brant & Community Centre. The very lives of children are already at risk. No more trucks"
198	Toronto	"This location is not acceptable."
199	Toronto	"It's a health hazard to the community"
200	Toronto	"This is in the neighborhood of wear I grew up and where my parents still live after 55 years!"
201	Toronto	"I am a local resident and strongly object to this proposal. Placing a plant such as this within a busy community is the height of idiocy, not to mention placing all residents at great risk. There is absolutely no justification for this sort of disregard for community safety."
202	Toronto	"It will negatively affect the numerous families living in that area"
203	Toronto	"I want to see the environment protected for my children. We live in the area right off Beechgrove and this will negatively impact us in many ways."
204	Toronto	"I am deathly afraid of a potential spill occurring in my neighbourhood. I am deathly afraid of air pollution from the biosolids waste emitting from the plant in addition to the trucks passing right in front of my home day in and day out. I reject this proposal in no uncertain terms"
205	Toronto	"As a long term Scarborough resident, I am tired of Scarborough being the dumping ground of corporate and city waste."
206	Toronto	"Its a disgrace"
207	Toronto	"Our community is too small to handle this. We already have the water treatment plant that stinks terribly- we don't need to add more waste into our air!"
208	Toronto	"This is a terrible idea. There are 2,500 tones of waste expected per day. At least 100 trucks coming in daily using Beechgrove Drive. Emit at leas 6 toxic and greenhouse gases. Our property values will plummet."
209	Toronto	"It just does not make any sense what so ever to build such plant in a residential neighborhood."
210	Ontario	"I don't believe such a site should be so close to residences."
211	Ontario	"This would seriously affect this small neighborhood."
212	Ontario	"I'm supporting my dear friend"
213	Ontario	"We need yomput waste away from people's homes"
214	Ontario	"I grew up in the neighborhood and still have friends and family there."
215	Ontario	"I grew up in this neighbourhood and my parents still reside there. Choose an area that isn't residential."
216	Ontario	"We care about the environment and used to live in the area."
217	Ontario	"Because it will negatively affect family who live in this area."
218	Ontario	"what about the effects on the lake, animals and sensitive ecosystem. this is a terrible plan to put a waste processing plant in West Hill1!"
219	Ontario	"Coronation Drive is the wrong location due too near residential area with limited access."
220	Ontario	"No waste through, in, or close by West Hill neighbourhood ever. Not safe. Too close to everything in the community and the environment. Horrible idea. Period."
221	Ontario	"My kids live right there"
222	Ontario	"This would be a terrible thing for a neighbourhood I love."
223	Ontario	"There are plenty of places to put that plant . Its not need in that neighbourhood. Is there not a more secluded area that it could be put ?"
224	Ontario	"We should not have waste trucked (100 trucks /day) into a residential area."
225	Ontario	"Nobody wants this is our neighborhood"
226	Ontario	"An environment issueKeep Scarborough healthy"
227	Ontario	"Enough pollution to our nearby neighborhoods. Our children have enough damage to undo."

228	Ontario	"I'm backing up my neighbours. We don't need this."
229	Ontario	"Nothing justifies this amount of pollution and noise."
230	Ontario	"The effect on residents health"
231	Ontario	"NO WAY PUT IT DOWN TOWN TORONTO AND HEAR THE BULLSHIT FLY"
232	Ontario	"It is unimaginably unhealthy and distasteful to truck waste through long established residential neighbourhoods exposing the residents to regular pollution, noise & danger. It's infuriating!!"
233	Ontario	"My sister lives around the corner"
234	Ontario	"I live in the area, and do not want this!!"
235	Ontario	"This is terrible. Since amalgamation Scarborough has been Toronto's dumping grounds. Robbed the people of there social programs and there profitable Public Utilities to pay the City's debt. Stop the travesty."
236	Ontario	"This is not something that should be allowed in such a residential area"
237	Ontario	"My family lives in the area. There is already too much truck traffic in the area. This is ridiculous."
238	Canada	"Enough is enough, it's about time the city council takes action to give this city back to the taxpayers- we are certainly paying more than enough in taxes !"
239	Canada	"It doesnt belong in a residential area."
240	Canada	"This is outrageous!"
241	Canada	"I love the biodiversity in the area that this residentially zoned neighbourhood is a steward for. Let's find another location for this obviously necessary service. I be that won't be hard."
242	Canada	"I am signing as I do not believe a facility like this should be in such a congested residential and parks area. The area is already congested with traffic as it is. The residents in east Scarborough do not need to be faced with this adverse decision and lowering of property values. I am a real estate agent and know the impact of such a facility in close proximity to residential homes. Plus so close to the newly designated Rouge National parks and Conservation area. Not a good idea for this location. For this proposal."
243	Canada	"Potential climate affects detrimental to our parks and waters"
244	Canada	"We all ready have a plant in the area"
245	Canada	"This plant needs to be built away from our neighbourhood. Rethink!"
246	Canada	"Do not want heavy trucks traffic in our neighbourhood streets"
247	Canada	"Not in a residential area!"
248	Canada	"This is so close to family, recreation, schools and natural environment. Wrong place to put it!"
249	Canada	"I am signing this petition because this project would be a life threatening project for the neighbourhood . It needs consultation from the neighbourhood."
250	Canada	"This is not the proper place for a facility of this type. The principal area around the proposed site is residential. Infrastructure is not sufficient to handle the volume of trucks proposed. For those residents in the area with breathing issues, there is tremendous risk if there are any leaks/accidents/odors. No information has been provided as to how the City/Province is going to "inspect what they expect" from the operator in terms of gasses, odors, leakage etc. This type of plant should be built outside of a residential area. The proposed site is adjacent to the Port Union Waterfront, an area the City has spent heavily on developing and spent a lot of time promoting. This does not make sense."
251	Canada	"I don't want this in my area"
